Mother Trouble Miranda J. Brady, 2024-10-01 *Mother Trouble* traces white maternal angst in popular culture across a span of more than fifty years from the iconic Rosemary's Baby to anti vaxx mom memes and HGTV shows The book narrows in on popular media to think about white maternal angst as a manifestation of feminism's unrealized possibilities and continued omissions since the second wave It interrogates intersecting systems of power which make mothers and their children the most impoverished people in the world and urges a greater appreciation in academic and popular thinking of the work that mothers do The book calls for an analytical expansion beyond gender to better address the erasure of reproductive labour and especially that performed by migrants and people of colour It illustrates the continued marginalization of racialized mothers and the disproportionate amount of labour performed by all mothers in a society where their work is devalued Ultimately *Mother Trouble* reveals how the unease around white motherhood in the media has become a proxy for the troubles faced by all mothers

Entertained or Else Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty first century and demonstrates how networked media have developed new technical means of capitalizing on boredom's state of suspension to make it into a source of value creation Focusing on the discursive technological and affective structures that encourage users to be entertaining and to remain entertained the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks It identifies the range of cultural techniques for codifying classifying sensing and pre-empting boredom as well as those that teach users counter

intuitively to embrace boring media as a means of coping with the intensities of always on existence. However, if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds, it is important to ask how else it might operate. While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism, this book attempts to think about the potential that might still be embedded in boredom's capacity to temporarily suspend or to neutralize dominant structures of attention and affect. Building on the work of Giorgio Agamben, Byung Chul Han, Roland Barthes, and from historical accounts of boredom and entertainment, the book provides a new understanding of boredom in the context of networked media.
