**Strategy in Context** Marc Day, 2024-10-24 Strategy in Context represents a pragmatic and novel approach to competitive strategy and strategic thinking. It makes use of numerous examples across the public and private sectors to demonstrate strategy from three dimensions: external context, internal context, and an organisation-specific context. This exciting new textbook explores different ways of thinking about strategy, balanced and underpinned throughout using a pragmatic perspective to address real-world strategic issues. Each chapter includes real-life short cases from a variety of sectors and regions designed to demonstrate how theoretical concepts are used to resolve practical challenges. Through this multi-dimensional approach, this book encourages managers to be more creative and ambidextrous in their strategic thinking, harnessing the power of context to leverage the best from their organisation's resources and capabilities. This textbook is suitable as both recommended and core reading for postgraduate MBA and executive students of Strategic Management. Online resources include PowerPoint slides and a test bank.

**Growth IQ** Tiffani Bova, 2018-08-09 The Wall Street Journal Top Ten Bestseller Growth IQ shows you the 10 strategies to sustainable growth based on a purpose-led culture for all businesses. A worthy successor to Michael Porter, Bova's book is that rare gift: it opens doors for new ideas and new actions. No glib answers here, simply hard-won wisdom that will provoke big changes for organizations large and small. Seth Godin, author of Linchpin. Tiffani Bova, the Growth and Innovation Evangelist at Salesforce, draws on her expertise as a consultant and practitioner to devise a new framework for business leaders looking to pursue growth. We're witnessing an age of endless customization, and growth strategy is no exception. There's no one-size-fits-all strategy; a winning strategy for one business may spell doom for another. In Growth IQ, Bova determines that there are ten simple but easily misunderstood growth paths and explains how companies can get a handle on their particular business context and use it to determine the right combination and sequence of growth paths to take them into the future. Bova breaks down the strategies deployed by a wide range of companies to show you how GE and John Deere have lasted over a century and continue to thrive by combining their strategy of innovative product development with a renewed focus on R&D and customer experience. Marvel transformed from a struggling comic book publisher to a global entertainment behemoth by realigning their market penetration strategy to focus on comic book characters instead of just comic books. Gateway's attempt at market expansion into brick-and-mortar retail led to its failure, while the same move by Apple has accelerated its growth. Whether your company is on a growth spurt in a worrying stall or showing signs of decline, Growth IQ is your map to charting the course of your company's future.

[Nothing But Net: 10 Timeless Stock-Picking Lessons from One of Wall Street's Top Tech Analysts](#) Mark Mahaney,2021-11-09 Find the winners avoid the losers and build a solid Tech portfolio for the long run with proven methods from legendary analyst Mark Mahaney The Tech industry is the stock market s hottest most profitable sector but it can be a roller coaster ride Companies with great ideas can end up going nowhere and some that dominate today will be sold at fire sale prices in five years Sure things can become sore things very rapidly

Nothing But Net provides the knowledge and insights you need to understand what's really hot to know what's not and to outperform other investors consistently and decisively. Famous for his smart, savvy and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long-term Tech stock investor, explaining everything he's learned during almost 25 years of analyzing internet stocks, including why revenue growth and customer metrics, not earnings, are what matter most to Tech investors. How to invest, not trade, in the great growth opportunities that lie ahead. How to determine when high valuations are a warning sign and when they signal an opportunity. I've watched the rise of some of the leading companies of today: Facebook, Amazon, Netflix, Google, and the fall of some of the leading companies of yesterday: Yahoo, eBay, and AOL. Mahaney writes, "Figuring out which companies really are going to be dominant franchises is an extremely hard thing to do. But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation." Nothing But Net provides powerful advice for the next two decades: lessons you can start applying today and use for years to come.
