*Negotiation: Science and Practice* Quintin Rares, 2013-07-12 Negotiation Science and Practice is a university level textbook and lecture series designed to teach effective skills and techniques in negotiation. It provides scientifically tested tools that allow anyone to construct and implement the best possible negotiation strategies in any negotiation scenario. From this pack you will learn the art, science and practice of influence as well as how to construct optimal agreements whether you are negotiating a settlement in a legal dispute, a contract to sell a business, a ceasefire in a conflict zone, the sale of your own home, a price rise of the goods or services your company provides, a wage dispute with a powerful union or even an amendment to legislation. The lectures in this textbook are as follows: Lecture 1 Negotiation dynamics available in full for free in the sample; Lecture 2 Preparation for negotiation; Lecture 3 Evaluation techniques; Lecture 4 Influence; Lecture 5 Cognitive biases, heuristics, errors and effects; Lecture 6 Group dynamics; Lecture 7 Logic and creativity; Lecture 8 Parachutes, problems and tricks; Lecture 9 Culture, human nature and individual difference; Lecture 10 Enforcement mechanisms; Lecture 11 Ethics, lying, the law and why good people do bad things; Lecture 12 Alternative dispute resolution; Lecture 13 Conflict. This book contains A comprehensive lecture series outlined above. Week by week multiple choice questions, 100 pages. Detailed answers and explanations to all week by week questions, 50 pages. A mid semester exam, A comprehensive reference glossary, 200 pages. Full academic abstracts to complement critical references, aiding a more detailed understanding and facilitating further exploration of the science behind each technique. The most comprehensive examination of the psychology of negotiation available, with clear examples of how it can be used to achieve desired outcomes. The most comprehensive description of common dirty tricks in negotiation and how to respond to them. Detailed explanations of the law and how it affects you as a negotiator, including important case summaries. Step by step explanations of how to calculate the need to know numbers in all negotiations.

**Company Valuation and Bankruptcy Prediction** Jan Klobucnik, 2013-11-18 Doctoral Thesis Dissertation from the year 2013 in the subject Economics Finance grade summa cum laude University of Cologne language English abstract The contribution of this study is manifold and relevant for academics and practitioners alike It adds to the literature in the fields of corporate finance financial accounting and stochastic modeling In particular this dissertation provides answers to the following questions given the less efficient markets can specialists as financial analysts provide additional information which contain investment value How can the true value of a company be determined with publicly available data and can discrepancies between fundamental and market values be exploited Finally is it possible to assess the firm's financial health and its likelihood of failure several years into the future Addressing these questions the study first illustrates the company valuation assessment by financial analysts as summarized in their target prices and the information processing by analysts and investors in detail Second this thesis offers a novel empirical implementation of a model for fundamental company valuation that employs accounting data In this context it demonstrates severe over and undervaluation from a fundamental perspective in the U.S. technology sector over the last 20 years Both the analysts company valuation captured by their target prices and the implementation of the fundamental company valuation model translate into significant investment value before and after transaction costs which supports the notion of non efficient

markets Finally one major contribution is to evaluate a new approach for bankruptcy prediction that is based on stochastic processes It is theoretically appealing and performs better especially for longer forecast horizons than standard methods
