collector's item that every fan will treasure for years to come ***Predicting Major League Baseball Playoff Probabilities Using Logistic Regression*** Evan Bittner, 2015 Major League Baseball teams are constantly assessing whether or not they think their teams will make the playoffs. Many sources publish playoff probabilities or odds throughout the season using advanced statistical methods. These methods are somewhat secretive and typically advanced and difficult to understand. The goal of this work is to determine a way to calculate playoff probabilities midseason that can easily be understood and applied. The goal is to develop a method and compare its predictive accuracy to the current methods published by statistical baseball sources such as Baseball Prospectus and Fangraphs.

Legends of October (Enhanced e-Book) Lyle Spencer, MLB.com Staff, Yogi Berra, 2013-10-29

From one Giant New York's Christy Mathewson in 1905 through the champion San Francisco Giants of 2010 and 2012, postseason stars of varying sizes, shapes, nationalities, and attitudes have emerged across the Major League Baseball landscape. While pitching has been the dominant theme from the beginning, there have been epic hitting performances and unforgettable defensive plays along the way, creating more than a century of memories for fans of the Postseason. *Legends of October* celebrates the greatest postseason performances in Major League history, complete with more than 30 minutes of video and 48 photographs.

Keep Your Eye on the Game Michael Ferguson, 2017 This study examines 11 years and 26,370 of Major League Baseball's i.e. MLB game outcomes to test whether distraction through scoreboard watching causes teams to choke under pressure. Results indicate that scoreboard watching significantly impacts the probability of winning a game, especially in playoff races. Specifically, teams in a playoff race had a 0.158 lower probability of winning games when the division leader won its game the previous day. Consistent with distraction theory, the analysis also shows that the distraction effects are 0.224 greater on home teams. There is evidence of increased distraction as criticality of games increase. When there are fewer than 10 games remaining in a playoff race, the impact of a division leader win reduces a team's win probability by 0.243. Changes to league structure reduced win probability by 0.039 for seasons starting in 2012. This involved the addition of a Wild Card team to each league and an increase to the value of winning a division. This study helps fill a gap in the literature in relation to research on external factors and their impact on game outcomes. If a team can account for factors related to winning a game, then it could be possible to gain a competitive advantage over the opposition. The findings also have practical applications. MLB teams can take initiatives to eliminate distraction and keep players' attention on the task at hand surrounding critical games.
