Facebook Nation Newton Lee,2012-09-15 President Barack Obama in his 2011 State of the Union Address called America the nation of Edison and the Wright brothers and of Google and Facebook U S Chief Information Officer Steven VanRoekel said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens after China and India This book portrays the social media ecosystem as a world of increasing Total Information Awareness which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency DARPA at the U S Department of Defense Back in the 60 s DARPA initiated and funded the research and development of Advanced Research Projects Agency Network ARPANET that went online in 1969 The success of ARPANET gave rise to the global commercial Internet in the 90 s and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo. As if life comes full circle in the 21st century private businesses and the ubiquity of social networks such as Facebook, Google, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever been invented. Indeed military and civilian technologies have interwoven into every fabric of our society as Facebook co-founder and CEO Mark Zuckerberg said. We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA, PIPA, blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science Technology and Society STS will find this book a valuable asset.

Gray, Siddharth Suri, 2019-05-07 In the spirit of Nickel and Dimed a necessary and revelatory expose of the invisible human workforce that powers the web and that foreshadows the true future of work Hidden beneath the surface of the web lost in our wrong headed debates about AI a new menace is looming Anthropologist Mary L. Gray and computer scientist Siddharth Suri team up to unveil how services delivered by companies like Amazon Google Microsoft and Uber can only function smoothly thanks to the judgment and experience of a vast invisible human labor force These people doing ghost work make the internet seem smart They perform high tech piecework flagging X rated content proofreading designing engine parts and much more An estimated 8 percent of Americans have worked at least once in this ghost economy and that number is growing They usually earn less than legal minimums for traditional work they have no health benefits and they can be fired at any time for any reason or none There are no labor laws to govern this kind of work and these latter day assembly lines draw in and all too often overwork and underpay a surprisingly diverse range of workers harried young mothers professionals forced into early retirement recent grads who can't get a toehold on the traditional employment ladder and minorities shut out of the jobs they want Gray and Suri also show how ghost workers employers and society at large can ensure that this new kind of work creates opportunity rather than misery for those who do it
