**Proceedings of the XVI International symposium Symorg 2018** Nevenka Žarkić-Joksimović, Sanja Marinković, 2018-06-12 Token Economy Shermin Voshmgir, 2025-04-20

The third edition of *Token Economy* is not just an update it is a reworking of a foundational book that has helped thousands make sense of how Bitcoin and other blockchain networks like Ethereum or Solana are reshaping our digital financial and political systems The book serves as an excellent primer for understanding the key aspects of the technological infrastructure as well as the decentralized applications built on top of it from DeFi to various token types and decentralized organizations It also explains the difference between DeFi CeFi and TradFi why blockchain networks can be considered the backbone of Web3 and the increasing role of AI This edition adds many practical use cases blending history systems theory and real world use cases to demystify everything from Bitcoin to Tokens and DAOs It explains how blockchain architecture token design and incentive mechanisms intersect with regulation politics and economics You ll learn how crypto rewrites money what stablecoins actually do how DAOs govern digital communities and why many token ecosystems fail not because of code but because of incentives and governance If you re learning building investing teaching or regulating in Web3 this book offers critical clarity in a field full of jargon As a longtime voice of clarity in the crypto world the author Shermin Voshmgir weaves together historical analysis technical insight and interdisciplinary critique in a way that makes complex systems both legible and accessible The third edition includes many more use cases than previous editions and reflects a maturing industry one where many early promises of decentralization have collided with the realities of centralization custody risk regulatory capture and broken incentive design While many books on crypto focus on trading or superficial overviews the book remains rooted in systems thinking and long term relevance
