Creating the Reflective Habit Michelle Lucas, 2023-06-12 Reflection is a critical skill which can enhance the quality of our professional and domestic lives. Yet in a world of busy reflective practice often falls to the bottom of the list. We are not alone in the struggle to use the pause button well. This book is here to help. The book offers a practical toolkit which shows you how to create a sustainable reflective habit. We begin by exploring the meaning and territory of reflection drawing from the literature to provide context and understanding. The following chapters contain prompts and exercises which will appeal to different processing preferences. The intention throughout this book is firstly to show that reflection means so much more than journaling and secondly to encourage an appetite for experimentation that results in a desire to reflect on a regular and sustainable basis. We invite you into an immersive experience playing with the multitude of reflective possibilities on offer. It is only through repeated trial and error, enlightenment and frustration that we will come to create our own reflective habit. Written by a coach and coach supervisor this practical book is an invaluable resource for helping practitioners but will also be immensely helpful to anyone and everyone who wants to get their pause button in good working order. The book also provides Learning Development professionals with a suite of tools and materials to help build the reflective practice skill set in their organisation.

Social Media Graham Meikle, 2024-04-30 From Facebook and YouTube to TikTok and WeChat this accessible book explores the relationships between public and personal communication on social media to understand their impacts on users' everyday lives. Social media have made possible new kinds of relationships, entertainment and politics and enabled billions of people to experience new forms of communication, community and communion. But social media are also profit driven data mining corporations and their core business model is often built around targeted surveillance that enables the commercial exploitation of their users' everyday lives. Graham Meikle explores the tensions between these different dimensions of social media, engaging with questions of communication, data, remix, news, visibility, citizenship and regulation. This second edition has been substantially revised: more than half of the text is entirely new to this edition and those sections that remain have been completely updated. This new edition includes analysis of the data driven business models of major social media firms and of how these firms are expanding into new areas such as AI. It also includes discussion of major developments in news surveillance and activism on social media as well as a new chapter on regulation. This book is an ideal critical introduction to social media in all their complexity.

Admap, 2010 **Get to Aha!: Discover Your Positioning DNA and Dominate Your Competition** Andy Cunningham, 2017-09-29 From the marketing strategist who helped Steve Jobs launch the original Apple Macintosh comes a groundbreaking guide to positioning any company for industry dominance Andy Cunningham has been at the forefront of tech and innovation since day one and she's been helping companies create new product categories ever since Now she reveals the winning framework she uses to transform markets and industries Get to Aha shows how to establish the kind of foundation world class brands are built on Too many business leaders fail to ask the most basic questions about their company Who are we And why do we matter before they leap right into branding Big mistake A company must first know itself establish its position before it can express its identity execute its branding There are three types of companies in the world each with its own DNA Mothers are customer oriented Mechanics are product oriented and Missionaries are concept oriented and it's absolutely critical for business leaders to know which type their company is to create an authentic and ultimately sticky position in the market A company's DNA is the key to achieving this and with it a competitive advantage Why Because if a Mechanic creates a marketing campaign based on its belief that it is a Missionary the underlying

positioning will not ring true and the company won't gain a foothold in the market. But if a company positions itself in alignment with its DNA it will resonate authentically and establish its role and relevance even in the face of a major competitor. Get to Aha presents a clear step by step framework that will help you determine your company's precise position in the marketing landscape using Andy's DNA based methodology. It takes you through the process of performing genetic testing on your company examining the market through the six Cs of positioning and developing your positioning statement a rational factual statement about your company's role and relevance. Then and only then can you create a branding and marketing strategy that will build market momentum and crush the competition. Trust Andy Steve Jobs did *The Times Index*, 2013-06.
