Bova breaks down the strategies deployed by a wide range of companies to show you how GE and John Deere have lasted over a century and continue to thrive by combining their strategy of innovative product development with a renewed focus on R&D and customer experience. Marvel transformed from a struggling comic book publisher to a global entertainment behemoth by realigning their market penetration strategy to focus on comic book characters instead of just comic books. Nothing But Net provides the knowledge and insights you need to understand what's really hot to know what's not and to outperform other investors consistently and decisively. Famous for his smart, savvy and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long term Tech stock investor, explaining everything he's learned during almost 25 years of analyzing internet stocks, including:

- Why revenue growth and customer metrics, not earnings, are what matter most to Tech investors
- How to invest, not trade, in the great growth opportunities that lie ahead
- How to determine when high valuations are a warning sign and when they signal an opportunity
- I've watched the rise of some of the leading companies of today: Facebook, Amazon, Netflix, Google, and the fall of some of the leading companies of yesterday: Yahoo, eBay, and AOL.

Mahaney writes: Figuring out which companies really are going to be dominant franchises is an extremely hard thing to do. But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation. Nothing But Net provides powerful advice for the next two decades: lessons you can start applying today and use for years to come.
