RJ Shavelson

Nfl Standings Compare:

International Sports Economics Comparisons Rodney D. Fort, John L. Fizel, 2004-03-30 This book brings together for the first time under a single cover international comparisons of the major topics in sports economics. Contributors are all renowned scholars of the international sports scene in Australia, New Zealand, Brazil, the Pacific Rim, North America, and Europe. The reader will find an overview of sports in particular countries and regions along with comparisons along the major topics of economic importance. In particular, the contributions compare and contrast revenues and costs, labor markets, restrictions and discrimination, market structures, league and association organizations, and outcomes, team profitability, and competitive balance and policy issues, especially competition policy. Aimed primarily at sports scholars, practicing sports professionals, and policymakers, the volume is also well suited for undergraduate sports economics, sports management, and sports law courses.

Advances in Knowledge Discovery and Data Mining Qiang Yang, Zhi-Hua Zhou, Zhiguo Gong, Min-Ling Zhang, Sheng-Jun Huang, 2019-04-03 The three volume set LNAI 11439, 11440, and 11441 constitutes the thoroughly refereed proceedings of the 23rd Pacific Asia Conference on Knowledge Discovery and Data Mining (PAKDD 2019) held in Macau, China, in April 2019. The 137 full papers presented were carefully reviewed and selected from 542 submissions. The papers present new ideas, original research results, and practical development experiences from all KDD related areas, including data mining, data warehousing, machine learning, artificial intelligence, databases, statistics, knowledge engineering, visualization, decision making systems, and the emerging applications. They are organized in the following topical sections: classification and supervised learning, text and opinion mining, spatio-temporal and stream data mining, factor and tensor analysis, healthcare, bioinformatics, and related topics, clustering and anomaly detection, deep learning models and applications, sequential pattern mining, weakly supervised learning, recommender system, social network and graph mining, data pre-processing, and feature selection, representation learning and embedding mining, unstructured and semi-structured data, behavioral data mining, visual data mining, and knowledge graph and interpretable data mining.

Economics Of Intercollegiate Sports, The (Second Edition) John C. Leadley, Randy R. Grant, Zenon X. Zygmont, 2014-10-21 Why do universities place so much emphasis on athletics? Are the salaries of head coaches excessive? Should student athletes be paid? Why is there so much cheating in college sports? Should athletic departments be subsidized by the university? Does Title IX unfairly discriminate against men's sports? This textbook is designed to help teach students about the business of college sports, particularly the big money sports of football and basketball, allowing them to answer these and other important questions. The book provides undergraduate students with the information and economic tools to analyze the behavior of the NCAA athletic conferences and individual colleges and universities in the market for college sports. Specific topics include the markets for athletes and coaches, the importance of athletics for colleges and universities, the finances of athletic departments, the influence of the media in commercializing college sports, issues of race and gender, and the possibilities for reforming college sports.
