Teaching Mathematical Reasoning in Secondary School Classrooms Karin

Brodie, 2009-10-08 For too many students mathematics consists of facts in a vacuum to be memorized because the instructor says so and to be forgotten when the course of study is completed In this all too common scenario young learners often miss the chance to develop skills specifically reasoning skills that can serve them for a lifetime The elegant pages of *Teaching Mathematical Reasoning in Secondary School Classrooms* propose a more positive solution by presenting a reasoning and discussion based approach to teaching mathematics emphasizing the connections between ideas or why math works The teachers whose work forms the basis of the book create a powerful record of methods interactions and decisions including dealing with challenges and impasses involving this elusive topic And because this approach shifts the locus of authority from the instructor to mathematics itself students gain a system of knowledge that they can apply not only to discrete tasks relating to numbers but also to the larger world of people and the humanities A sampling of the topics covered Whole class discussion methods for teaching mathematics reasoning Learning mathematical reasoning through tasks Teaching mathematics using the five strands Classroom strategies for promoting mathematical reasoning Maximizing student contributions in the classroom Overcoming student resistance to mathematical conversations *Teaching Mathematical Reasoning in Secondary School Classrooms* makes a wealth of cutting edge strategies available to mathematics teachers and teacher educators This book is an invaluable resource for researchers in mathematics and curriculum reform and of great interest to teacher educators and teachers

[Mathematics Worksheets Don't Grow Dendrites](#) Marcia L. Tate, 2008-08-21 Engage students in effective meaningful experiences in mathematics Following the format of Marcia L Tate s previous bestsellers this user friendly guide offers math teachers 20 powerful brain based teaching strategies that incorporate visual auditory kinesthetic and tactile modalities to promote student engagement and achievement The book focuses on the NCTM

focal points and includes a bibliography of math and literature resources and a lesson planning guide The chapters offer A what why and how for each strategy Specific brain compatible mathematics activities and lessons from real teachers across the country Space for teachers to reflect on and apply individual strategies in their lessons *Classroom Assessment* Peter W. Airasian,2001 Airasian presents complex concepts clearly so that pre service teachers can understand them and solidly grounds these concepts in best practice through practical real well integrated examples He talks to not at users The text conceives of classroom assessment in a broader way than many other texts It focuses not only on the assessment needs of testing grading interpreting standardized tests and performance assessments but also on assessment concerns in organizing a classroom at the start of school planning and implementing instruction and strategies of teacher self reflection It views classroom assessment as an everyday ongoing integral part of teaching not something that is separated from life in classrooms The text is organized in a manner that follows the natural progression of teacher decision making from organizing the class as a learning community to planning and conducting instruction to the formal evaluation of learning and finally to grading
