was, this shocked the hell out of me. I would have never known about my mom's birthday if I had not been there. I also learned from my mom that my mom never had a wedding. She was just too busy to get married. I am so glad that I got to be there for my mom's birthday.

had me out there, so I had to go back and finish it with glass, so I did about two hours of that, and then I just got out and I didn't have any of the tools or anything, so I just had to make it work. I had to just kind of improvise, because the idea I had was about a mile away from me. I had to kind of just start thinking of something to do, and I just kind of winged it, I'm not planning, but I'm more of a "go with the flow" kind of person, so I just kind of winged it.

You'll explore two methods of image generation: vision transformers and diffusion models, and learn vital AI development techniques as you go. Dive into the powerful models behind AI image generators. The best way to learn is to build something from scratch, and in this book you'll build your very own diffusion model and vision transformer. As you work through each stage of development, you'll develop an understanding of how these models can be customized, applied, and integrated for impressive multimodal AI. Build a Text to Image Generator from Scratch teaches you how to build and train models to generate high resolution images based on text descriptions. Edit an existing image based on text prompts. Build and train a model to add captions to images. Build and train a vision transformer to classify images. Fine tune LLMs for downstream tasks such as classification, text or image generation. Better differentiate real images from deepfakes. About the technology: AI generated images appear everywhere, from high end advertising to casual social media feeds. Text to image tools like Dall-e, Midjourney, and Flux make it easy to create AI art, but how do they work? In this book, you'll find out by building your own text to image generator. About the book: Build a Text to Image Generator from Scratch explores both transformer based image generation and diffusion models. You'll work hands-on to build a pair of simple generation models that can classify images, automatically add captions, reconstruct images, and enhance existing graphics. Author Mark Liu guides you every step of the way with clear explanations, informative diagrams, and eye-opening examples you can build on your own laptop. What's inside: Build a vision transformer to classify images. Edit images using text prompts. Fine tune image models. About the reader: Requires basic knowledge of generative AI models and intermediate Python skills. About the author: Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky. He is also the author of Learn Generative AI with PyTorch.
