## **Paleoimaging** **Paleoimaging:**

**Paleoimaging** Ronald G. Beckett, Gerald J. Conlogue, 2009-09-21 Medical and industrial imaging methods have come to be recognized as powerful tools for documentation and data collection in many nontraditional settings. In *Paleoimaging Field Applications for Cultural Remains and Artifacts* two of the most preeminent experts in the field provide an in-depth examination of a range of imaging techniques and explain how these techniques can be applied to all aspects of forensic and archaeological analysis. The first part of the book examines paleoimaging multimodalities highlighting the advantages and disadvantages of each imaging technique in different scenarios. The authors explore photography, conventional radiography, endoscopy and various forms of computer based imaging. Next they present methodological and procedural standards for the various imaging techniques. They also demonstrate how multimodal imaging can assist nondestructive data collection of non-biological cultural artefacts. A final section addresses radiation safety and field safety concerns. Case studies, tables and templates of forms for documentation of findings enhance the text with practical information. Filled with over 380 images this book is supplemented with an accompanying downloadable resource in which the authors draw from their global experience in the paleoimaging of cultural remains and artefacts offering a view of the diverse environments in which field paleoimaging is conducted. The breadth of the authors expertise and the rich images contained in the book and downloadable resources make this resource an essential reference for those who seek to explore the mysteries of the past.

### **Advances in**

**Paleoimaging** Gerald J. Conlogue, Ronald G. Beckett, 2020-08-10 *Advances in Paleoimaging Applications for Paleoanthropology, Bioarchaeology, Forensics and Cultural Artifacts* builds on the research and advances in technology since the writing of the authors first book *Paleoimaging Field Applications for Cultural Remains and Artifacts* ISBN 978 1 4200 9071 0. Since *Paleoimaging* was published in 2009 additional research settings for the application of advanced imaging technologies have been identified. Practices are now more widespread and standardized with the capabilities and utilization of imaging methodologies increasing dramatically. Given the numerous advances in paleoimaging technique and technology this book chronicles the evolution that has taken place in all the imaging modalities. Chapters include the coverage of magnetic resonance imaging, computed tomography, plane and digital radiography, endoscopy and applications of x-ray fluorescence as well as the principles of industrial radiography. While the book focuses on a multimodal imaging approach to anthropological and archaeological research the authors and contributing authors have vast experience in other areas and present coverage of biological applications as well. The multidisciplinary chapters provide a foundation to understand the application of various imaging modalities in archaeological, anthropological, bioanthropological and forensic settings. As such *Advances in Paleoimaging* will serve as an essential reference for conservators, museum archivists, forensic anthropologists, paleopathologists and archaeologists who perform non-destructive research on historical or culturally significant artifacts, remains or material from a forensic investigation. The concepts and methods presented in this text are supported with case

**Paleoradiology** R.K. Chhem,D.R. Brothwell,2007-11-04 Paleoradiology is the use of X rays and advanced medical imaging modalities in the evaluation of ancient human and animal skeletons as well as biological materials from archaeological sites Paleoradiological studies have been performed on mummies skeletal remains and fossils to determine their sex and age at death Diagnostic paleoradiology is the use of X ray studies to detect ancient diseases The broad range of themes and imaging techniques in this volume reflects four decades of research undertaken by Don Brothwell in the fields of anthropology human paleopathology and zooarchaeology combined with two decades of skeletal radiology experience during which Rethy Chhem read over 150 000 skeletal X ray and CT studies
