

LINEAR EQUATIONS WORD PROBLEMS

Type

SLOPE-INTERCEPT

Notes:

Use when given a rate of change (m) and a starting point (b).

1. Evan is going to the county fair this weekend. The admission to the fair is \$5 and the cost per ride is \$0.50. If his parents gave him \$20, write and solve a linear equation to find how many rides he can go on.

$$m = 0.50$$

$$b = 5.00$$

$$y = 0.50x + 5.00$$

$$20 = 0.50x + 5$$

$$\frac{15}{0.5} = \frac{0.50x}{0.5}$$

$$x = 30 \text{ rides}$$

2. While visiting Crimson Lake, Sally decided to go kayaking. The rangers charge \$8.50 per hour in addition to a \$25.00 deposit to rent the kayak. If she rented the kayak from 11:30 a.m. to 2:30 p.m., write and solve a linear equation to find the total cost to rent the kayak.

$$m = 8.50$$

$$b = 25.00$$

$$y = 8.50x + 25.00$$

$$y = 8.50(3) + 25$$

$$y = \$50.50$$

3. Alex bought a new truck for \$42,935. According to the dealer, the truck will depreciate approximately \$4,200 per year. Write and solve a linear equation to find how many years until the car is worth \$5,135.

$$m = -4200$$

$$b = 42935$$

$$y = -4200x + 42935$$

$$5135 = -4200x + 42935$$

$$-37800 = -4200x$$

$$x = 9 \text{ years}$$

4. If you buy a car wash at the gas station for \$6.00, the cost per gallon is \$2.35. If you have \$40, write and solve a linear equation to find the number of gallons of gas you can afford.

$$m = 2.35$$

$$b = 6$$

$$y = 2.35x + 6.00$$

$$40 = 2.35x + 6$$

$$34 = 2.35x$$

$$x = 14.41 \text{ gal}$$

Type

STANDARD FORM

Notes:

Use when the problem relates 2 different objects.

5. Sam ordered two hamburgers and three hotdogs from the concession stand at the baseball game. His bill came to \$19.05. If hamburgers cost \$5.25 each, write and solve a linear equation to find the cost of each hot dog.

$$x = \text{hamburgers}$$

$$2x + 3y = 19.05$$

$$y = \text{hotdogs}$$

$$2(5.25) + 3y = 19.05$$

$$10.50 + 3y = 19.05$$

$$3y = 8.55$$

$$y = \$2.85$$

Palette Of Problems May 2014 Answers:

Mind and Matter Jiri Benovsky, 2018-12-08 In this book the author takes a stand for a variant of panpsychism as being the best solution available to the mind body problem. More exactly he defends a view that can be labelled dual aspect pan proto psychism. Panpsychism claims that mentality is ubiquitous to reality and in combination with dual aspect monism it claims that anything from fundamental particles to rocks trees and human animals has two aspects a physical aspect and a mental aspect. In short the view is that the nature of reality is physical mental. But this does not mean according to the author that rocks and photons think or have conscious experiences in the sense in which human animals have experiences. This is where pan proto psychism enters the picture as being a better theoretical option where the mental aspects of fundamental particles rocks and trees are not experiential. Many hard questions arise here. In this book Benovsky focuses on the combination problem in short how do tiny mental aspects of fundamental particles combine to yield macro phenomenal conscious experiences such as your complex experience when you enjoy a great gastronomic meal. What makes the question even harder is that the combination problem is not just one problem but rather a family of various combination issues and worries. Benovsky offers a general strategy to deal with these combination problems and focuses on one in particular namely the worry concerning the existence of subjects of experience. Indeed if standard panpsychism were true we would need an explanation of how tiny micro subjects combine into a macro subject like a human person. And if panproto psychism is true it has to explain how a subject of experience can arise from proto micro mental aspects of reality. Benovsky shows that understanding the nature of subjectivity in terms of the growingly familiar notion of mineness in combination with an eliminativist view of the self allows us to have a coherent picture where this type of combination problem is avoided without throwing the baby out with the bathwater.

In Defence of Cosmopsychism Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness. In this ambitious and original study Khai Wager defends cosmopsychism the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness. Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness bringing it into productive dialogue with closely related views such as panpsychism panqualityism and perennialism. The result is a fresh perspective on one of philosophy's deepest puzzles the nature and origin of consciousness. The problem of phenomenal consciousness asks how subjective experience can emerge from non conscious matter. Fundamental approaches reject the idea that consciousness arises from non conscious matter instead proposing that it is present at the most basic level of reality. Panpsychism the most prominent such view holds that all fundamental microphysical entities are conscious. This however leads to the combination problem how do billions of micro level minds combine to form distinct macro level minds like ours. Cosmopsychism offers a radical alternative rather than being formed from a combination of micro level instances of consciousness individual minds derive from a larger cosmic level consciousness. As a result

cosmopsychism sidesteps the combination problem entirely. However a new and equally pressing challenge arises the derivation problem: how do individual minds derive from the cosmic consciousness? Through rigorous and insightful analysis Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism. As such this first book length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it.

Science and the Other Jan Linhart, 2026-01-09. Modern science has given us the superpowers that have brought about the Anthropocene but unfortunately not the wisdom to face its existential challenges. We cannot afford to dismiss potentially useful knowledge on mere ideological grounds without due assessment. *Science and the Other* is an in depth exploration of what hinders us from engaging in cross fertilising pluriversal dialogue. The book examines how scientific universalism naturalises the exploitation of both human and non human nature. Other ed knowledge practices are marginalised and excluded from scientific discourse on the presumption that they are incompatible with scientific evidence. However an in depth comparative analysis of the marginalised views and practices of the Brazilian Potiguara nation shows that their cosmology is not contradicted by scientific evidence and hence a constructive dialogue should be possible. Furthermore the use of radically different metaphors paints a different picture of reality allowing onto epistemic shifts and opening up new horizons towards alternative futures beyond the scope of modern colonial metaphysics.
