to cover the three essential components of the new surgical approach the technological aspects the basic endoscopic surgical

skills and the operative techniques Visualization of the operative field exposure and execution of remote manipulations are

dependent on optimal function of the ancillary apparatus without which endoscopic surgery cannot be practised Familiarity

important is the acquisition of the basic skills of endoscopic surgical practice since these differ in several important respects

from those of conventional open surgery Mastery of the craft of endoscopic surgery requires a determined commitment to

training and is no easy option but once acquired is rewarded by the extreme professional satisfaction experienced when one

witnesses the remarkable progress of patients who have undergone major surgical interventions with minimal discomfort and
