Build a Text-to-Image Generator (from Scratch) Mark Liu, 2025-12-30 Get a free eBook PDF or ePub from Manning as well as access to the online liveBook format and its AI assistant that will answer your questions in any language when you purchase the print book. This book takes you step by step through creating your own AI models that can generate images from text. You'll explore two methods of image generation: vision transformers and diffusion models, and learn vital AI development techniques as you go. Dive into the powerful models behind AI image generators. The best way to learn is to build something from scratch, and in this book you'll build your very own diffusion model and vision transformer. As you work through each stage of development, you'll develop an understanding of how these models can be customized, applied, and integrated for impressive multimodal AI. *Build a Text to Image Generator from Scratch* teaches you how to build and train models to generate high resolution images based on text descriptions. Edit an existing image based on text prompts. Build and train a model to add captions to images. Build and train a vision transformer to classify images. Fine tune LLMs for downstream tasks such as classification, text or image generation. Better differentiate real images from deepfakes. About the technology: AI generated images appear everywhere from high end advertising to casual social media feeds. Text to image tools like Dall-e, Midjourney, and Flux make it easy to create AI art, but how do they work? In this book, you'll find out by building your own text to image generator. About the book: *Build a Text to Image Generator from Scratch* explores both transformer based image generation and diffusion models. You'll work hands on to build a pair of simple generation models that can classify images, automatically add captions, reconstruct images, and enhance existing graphics. Author: Mark Liu guides you every step of the way with clear explanations, informative diagrams, and eye opening examples you can build on your own laptop. What's inside: *Build a vision transformer to classify images*, *Edit images using text prompts*, *Fine tune image models*. About the reader: Requires basic knowledge of generative AI models and intermediate Python skills. About the author: Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky. He is also the author of *Learn Generative AI with PyTorch*. Table of Contents: Part 1: 1 A tale of two models: Transformers and diffusions; 2 Build a transformer; 3 Classify images with a vision transformer; 4 Add captions to images; Part 2: 5 Generate images with diffusion models; 6 Control what images to generate in diffusion models; 7 Generate high resolution images with diffusion models; Part 3: 8 CLIP: A model to measure the similarity between image and text; 9 Text to image generation with latent diffusion; 10 A deep dive into Stable Diffusion; Part 4: 11 VQGAN: Convert images into sequences of integers; 12 A minimal implementation of DALL-E; Part 5: 13 New developments and challenges in text to image generation.
