At what Cost Nicholas Freudenberg, 2021 An incisive and powerful investigation of corporate impact on human and planetary well being Freedom of choice lies at the heart of American society Every day individuals decide what to eat which doctors to see who to connect with online and where to educate their children Yet many Americans don't realize that these choices are illusory at best By the start of the 21st century every major industrial sector in the global economy was controlled by no more than five transnational corporations and in about a third of these sectors a single company accounted for more than 40 percent of global sales The available options in food healthcare education transportation and even online presence are largely constructed by corporations whose sweeping influence have made them the public face and executive agents of 21st century capitalism At What Cost confronts how globalization financial speculation monopolies and control of science and technology have enhanced the ability of corporations and their allies to overwhelm influences of government family community and faith As corporations manipulate demand through skillful marketing and veto the choices that undermine their bottom line free consumer choice has all but disappeared and with it the personal protections guarding our collective health At What Cost argues that the world created by 21st century capitalism is simply not fit to solve our most serious public health problems from climate change to opioid addiction However author and public health expert Nicholas Freudenberg also shows that though the road is steep human and planetary well being constitute a powerful mobilizing idea for a new social movement one that will restore the power of individual voice to our democracy With impeccably detailed research and an eye towards a better future At What Cost arms ordinary citizens activists and health professionals with an understanding of how we've arrived at the precipice and what we can do to ensure a healthier collective future

Women in Antitrust Verônica de Castro Lameira, 2023-11-05 This is the first international book of the Women in Antitrust Network and we could not be more grateful for the opportunity to carry out this project and happier with the result The ambition to

organize a book written by women from different countries and nationalities rose from the success of the national book *Mulheres no Antitruste* which is already in its 6th edition as well as from the WIA's dream of expanding the reach of its projects and introducing them to women from antitrust academic community outside Brazil. Aiming to understand and pursue the most recent discussions on Antitrust Law in different jurisdictions we invited brilliant authors to contribute with unpublished articles about topics they considered most relevant and pertinent. Furthermore, in order to cover even more recent topics with subjects still under discussion we included a section in the book dedicated to shorter and already published articles and papers in order to make the book updated and informative. Thus, the WIA Network's first international book brings new and relevant contributions to the academic antitrust community while highlighting recent discussions which can encourage readers to develop new studies and research. The authors were selected amongst women who are dedicated to understanding and resolving relevant issues of Antitrust Law and were essential to the achievement of this project. To this end, this book went through a long process taking two years of dedication from the WIA Academic Coordination. We have selected the invited authors, sent the invitations, organized the agendas to meet the authors' deadlines, chosen the articles already published which make up the Session 2 of the book and finally analyzed, reviewed and edited the articles.

Intelligent Analytics for Industry 4.0 Applications Avinash Chandra Pandey, Abhishek Verma, Vijaypal Singh Rathor, Munesh Singh, Ashutosh Kumar Singh, 2023-06-06. The advancements in intelligent decision making techniques have elevated the efficiency of manufacturing industries and led to the start of the Industry 4.0 era. Industry 4.0 is revolutionizing the way companies manufacture, improve and distribute their products. Manufacturers are integrating new technologies including the Internet of Things (IoT), cloud computing and analytics, and artificial intelligence and machine learning into their production facilities throughout their operations. In the past few years, intelligent analytics has emerged as a solution that examines both historical and real time data to uncover performance insights. Because the amount of data that needs analysis is growing daily, advanced technologies are necessary to collect, arrange and analyze incoming data. This approach enables businesses to detect valuable connections and trends and make decisions that boost overall performance. In Industry 4.0, intelligent analytics has a broader scope in terms of descriptive, predictive and prescriptive subdomains. To this end, the book will aim to review and highlight the challenges faced by intelligent analytics in Industry 4.0 and present the recent developments done to address those challenges.
