discoveries in a limited way thought Bateson's Mendelism represented a backward step since it pushed growing knowledge of the modifying role of environments internal and external to the margins Weldon's untimely death in 1906 before he could finish a book setting out his alternative vision is Radick suggests what sealed the Mendelian victory Bringing together extensive archival research with searching analyses of the nature of science and history Disputed Inheritance challenges the way we think about genetics and its possibilities past present and future    **John Steinbeck** Robert B.
