Lucid Dying Sam Parnia, 2024-08-06 From internationally renowned expert in resuscitation and New York Times bestselling author Sam Parnia MD PhD comes a groundbreaking look at what happens to us when we die based on the largest ever research study run on recalled experiences of death. Today for the first time in history the scientific exploration of death and what happens when we die is real, active and ongoing. Contrary to popular perceptions this subject is no longer the remit of philosophy religion or personal opinion. Truly remarkable scientific discoveries that will fundamentally affect everyone's lives now and in the future are taking place yet very few people are aware of them. Most people including scientists and doctors maintain strong beliefs about death and its experience. Those beliefs are rooted in traditional and often cultural notions of death. But what if all that we have come to believe about death is fundamentally wrong? What if the paradigm we have been operating within no longer exists? What if death is not the end we thought? *Lucid Dying* is the first book to share that science. Presenting data derived from multiple groundbreaking studies Dr Parnia shows that the entity we refer to as consciousness our Self does not seem to become annihilated when we die. In fact during death our consciousness vastly expands and leads to a vivid experience that follows a very specific narrative arc. These studies support that there really is a universal experience of death that is meaningful, transcendent, positive and transformative not hallucinatory, delusional or illusory as previously imagined. In his latest book Dr Parnia weaves empirical research with gripping stories to show us the truth of how death is not the end we all thought and how anyone can harness the newfound wisdom to lead deeper, more intentional lives.
