## Amazon 2025 Store Hours:

*Global Innovation, Finance, and International Commerce* F. John Mathis, Raja M. Almarzoqi, 2022-12-12 This book analyses the historical context and progression of significant innovations beginning with the industrial revolution starting around 1750 to the present. It explores the interrelationship causes and evolutionary process of contemporary disruptive inventions and the role played by global finance and international commerce to support these. First the authors examine the environment and circumstances surrounding the inventors and explore their backgrounds to determine why at a specific time they identified a need that became the seed for invention and what was their method of successfully commercializing their innovation. Secondly they focus on the financing of the inventor the innovation and the commercialization of the invention. They analyze the changes in finance during the shift from a labor based production process to a more capital intensive production process and what new financial products or financial markets were created to facilitate this transition. Third they explore the impact of global commerce on the inventor country's innovation environment and international competition impacting the innovation's production distribution and sales as well as investigating any financial impact from the demand side and whether that impact was domestic or global in character. Furthermore they consider if and how global finance and international commerce including the migration of people together play a role in helping the disruptive invention satisfy a need in society whether from a production or consumption perspective. Finally they search for common elements that repeatedly inspired inventors and their disruptive innovations over time. This book will appeal to global government officials business leadership early career professionals and students across a number of disciplines including finance economics business engineering and technology.
