The United States is a nation in crisis While Washington s ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare we face an array of foreign policy crises for which we seem increasingly unprepared Among these none is more formidable than the unprecedented partnership developing between Russia and China suspicious neighbors for centuries and fellow Communist antagonists during the Cold War The two longtime foes have drawn increasingly close together because of a confluence of geostrategic political and economic interests all of which have a common theme of diminishing subverting or displacing American power While America s influence around the world recedes in its military and diplomatic power in its political leverage in its economic might and perhaps most dangerously in the power and appeal of its ideas Russia and China have seen their influence increase From their support for rogue regimes such as those in Iran North Korea and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft Moscow and Beijing are playing the game for keeps Meanwhile America pledged to leading from behind no longer does much leading at all In Return to Winter Douglas E Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian Chinese Axis and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance which may soon threaten the peace and security of the world *Cyber Warfare* Paul Rosenzweig,2013-01-09 This book provides an up to date accessible guide to the growing threats in cyberspace that affects everyone from private individuals to businesses to national governments *Cyber Warfare How Conflicts In Cyberspace Are Challenging America and Changing The World* is a comprehensive and highly topical one stop source for cyber conflict issues that provides scholarly treatment of the subject in a readable format The book provides a level headed concrete analytical foundation for thinking about cybersecurity law and policy questions covering the entire range of cyber issues in the 21st century including topics such as malicious software encryption hardware intrusions privacy and civil liberties concerns and other interesting aspects of the problem In Part I the author describes the nature of cyber threats

including the threat of cyber warfare Part II describes the policies and practices currently in place while Part III proposes optimal responses to the challenges we face The work should be considered essential reading for national and homeland security professionals as well as students and lay readers wanting to understand of the scope of our shared cybersecurity problem
