**The Role of Innovation and Entrepreneurship in Economic Growth** Aaron Chatterji, Michael J Andrews, Josh Lerner, Scott Stern, 2022-03-17 Innovation and entrepreneurship are ubiquitous today both as fields of study and as starting points for conversations among experts in government and economic development. But while these areas continue to attract public and private investments many measurements of their resulting economic growth including productivity growth and business dynamism have remained modest. Why this difference? Because not all business sectors are the same and the transformative gains of some industries have been offset by stagnation or contraction in others. Accordingly a nuanced understanding of the economy requires a nuanced understanding of where innovation and entrepreneurship occur and where they matter. Answering these questions allows for strategic public investment and the infrastructure for economic growth. The Role of Innovation and Entrepreneurship in Economic Growth the latest entry in the NBER conference series seeks to codify these answers. The editors leverage industry studies to identify specific examples of productivity improvements enabled by innovation and entrepreneurship including those from new production technologies increased competition new organizational forms and other means. Taken together the volume illuminates whether the contribution of innovation and entrepreneurship to economic growth is likely to be concentrated be it selected sectors or more broadly
