Studies Of Cloud, Convection And Precipitation Processes Using Satellite Observations William B Rossow, George Tselioudis, Zhengzhao Johnny Luo, 2022-10-26 Clouds convection and precipitation processes are central components of Earth's weather and climate. They are produced by atmospheric motions across a very wide range of space-time scales from local weather to long-term global climate variation. They feedback on these motions by perturbing the heating-cooling that drives the atmospheric circulation. These processes also perturb the oceanic circulation and land surface properties that affect the atmospheric circulation. Because of the coupling of the atmosphere-ocean-land system across all scales by cloud convection and precipitation processes, studying their behaviors requires measurements in space-time variations across all these scales simultaneously. Satellite constellations with global coverage and high time resolution offer the ideal platforms for such observations. This book summarizes some of the latest research using combinations of various satellite observations to study these processes and to evaluate their representations in global weather and climate models. Included with this publication are downloadable electronic slides and accompanying notes of each lecture for students, teachers, and public speakers around the world to be better able to understand cloud convection and precipitation processes.

Shedd, Andrew Badger, 2025-12-02 A definitive headline-making exposé of how the Chinese Communist Party (CCP) has carried out the largest-scale theft of intellectual property, technology, and data in history, reshaping the global balance of power and redrawing the geopolitical map for decades to come. The Great Heist exposes China's unprecedented state-orchestrated espionage campaign to strip the United States and its allies of their economic, technological, and military edge. Through a coordinated whole-of-society strategy, the Chinese Communist Party has dramatically expanded its covert operations to acquire America's most valuable innovations, stealing defense secrets and proprietary technology from companies like Boeing, Lockheed Martin, Google, T-Mobile, and Tesla. By exploiting both human and cyber vulnerabilities, China has quietly looted the crown jewels of Western technology, saving itself trillions in R&D costs since the 1990s with an ongoing brazenness fueled by decades of Western inaction. Drawing on exclusive investigations and interviews with intelligence officers, corporate security teams, senior policymakers, and espionage victims, David R. Shedd and
