Collective Labour Rights for Self-Employed Workers Charalampos Stylogiannis,2023-08-22 Platform work arrangements are often defended as an expression of technological progress with the potential to enable people to work as self employed individuals often without any supervision or control However by now it is well documented that platform work not only shares important features of flexibility and precariousness with other casual work arrangements that are on the rise around the world but it also entails the risk of excluding a significant portion of workers from the protection of fundamental collective labour rights including their coverage from collective agreements In this important and

timely book the author shows how a human rights based approach HRBA towards collective labour rights can bridge this protection gap Such an approach identifies workers regardless of their employment status as rights holders that are entitled to rights like the right to collective bargaining derived from international human rights and labour rights instruments Fully describing the phenomenon of platform work as well as presenting a detailed global overview of responses related to the challenges stemming from platform work arrangements the research *inter alia* covers aspects such as the following problems challenges and questions related to platform work arrangements and how those are linked to broader labour market trends platform work's deeper foundational implications for labour law legal developments related to the regulation of platform work with an assessment of their limits when it comes to collective labour rights also recognised as human rights various ways in which platform workers and other atypical workers have managed to exercise their collective labour rights and promising indications of closer cooperation between organised labour and workers in non standard forms of employment The analysis draws on international human rights and labour rights treaties and conventions domestic legislation and regulations rulings from international and national courts and interpretative and authoritative sources including the relevant legal literature The book manifests and responds to a genuine need for in depth research with respect to the protection of the human rights of platform workers with an analytical framework that will ensure their adequate protection Its crucial observations will be welcomed by practitioners in labour law human rights law and competition law as well as by academics human resources professionals and labour and employment policymakers

Chanita Hughes Halbert, PhD, 2023-11-08 Despite improvements in strategies for early detection and cancer treatment racial and ethnic groups and individuals from other medically underserved populations continue to experience disparities in cancer morbidity and mortality Research in cancer health disparities has evolved from first generation studies that described racial differences in morbidity and mortality to research that examines the efforts of interventions that focus on increasing access to early detection and treatment As a result of these efforts racial background socioeconomic characteristics access to high quality cancer care and psychological and social factors have been documented as important determinants of cancer health disparities these factors provide the context within which cancer is detected treated and prevented The field of cancer health disparities is now at a critical juncture where it is essential to move beyond descriptive information on determinants of disparities in cancer morbidity and mortality to translational studies that examine basic biological processes and how these processes interact with social psychological and behavioral factors to contribute to disparities in cancer risk and outcomes Empirical evidence about the influence of multilevel determinants has grown and now more than ever efforts are being made to understand the independent and interactive effects of biological psychological behavioral and social determinants of cancer health disparities and to translate this information into sustainable interventions for cancer prevention control and treatment Provides an in depth examination of emerging evidence about multilevel determinants of cancer health disparities
