Open Court Comprehension 4th Grade:

The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

WrightGroup/McGraw-Hill, 2001-06 **El-Hi Textbooks & Serials in Print, 2005**, 2005 **Instructor**, 1978 **On the Miss Middleton Effect** Geraldine E. Rodgers, 2022-07-20 Miss Middleton's scores are indeed a frozen moment in time which prove the existence in 1913 and 1914 of automatic phonic decoding of print as opposed to conscious psycholinguistic decoding of print The scores also prove that automatic decoding does result from the phonic sound method to teach reading since that is how Miss Middleton's children learned to read However the reading experts in 1914 and after must have misinterpreted scores like Miss Middleton's wildly fluctuating scores which obviously were the result of freely wandering attention by concluding instead that the scores had proved that the sound method had failed The truth is that such low reading comprehension scores on silent reading comprehension tests for phonic trained classes suggest the presence of healthy automatic conditioned reflexes in reading Such scores may result from the Miss Middleton Effect of voluntarily wandering attention while reading automatically Her children simply did not bother to pay attention to what they were reading automatically but could have done so if they felt like it Yet the inferior deaf mute sight word method forces children's attention to meaning or they cannot read at all They may therefore score higher on simple reading comprehension tests but far far worse on spelling and on reading correctly the actual words on the page
