 laboratory environment and it sheds new lights on the various aspects that are necessary for the implementation of
 intelligent laboratory architecture and infrastructure Smart technologies are increasingly dominating our everyday lives and
 have become an indispensable part of the industrial environment The laboratory environment which has long been rather
 conservative has also set out to adapt smart technologies with regards to Industry 4.0 and the Internet of Things IoT for the
 laboratory Due to the heterogeneity of the existing infrastructure and the often complex work processes standardization is
 slow e.g. to implement device interfaces or standardized driver protocols which are urgently needed to generate standardized
 data streams that would be immanent for post processing of data Divided into 9 chapters this book offers an authoritative
 overview of the diverse aspects in the generation and recording of uniform data sets in the laboratory and in the processing
 of the data and enabling seamless processing towards machine learning and artificial intelligence In the first part of the book
 readers will find more about high throughput systems automation robotics and the evolution of technology in the laboratory
 The second part of the book is devoted to standardization in lab automation in which readers will learn more about some
