Information Systems: The Connection Of People And Resources For Innovation - A Textbook

Cheng K Hsu, 2013-01-25 This unique new textbook on Information Systems IS provides an answer to a few basic questions in the field What is the scientific nature of IS How do we design IS in today's connected world What is the relationship between IS and innovation in knowledge economies Whereas mainframe corporate computers tended to dominate the thinking in the 1980s the dominating factor today is personal digital devices that connect the world as one whole IS Network science is emerging to describe these digital connections e.g. social networking and service science is similarly emerging to describe service value networks This book therefore synthesizes the emerging network science and service science with the classic IS theory resulting in a new set of principles for IS strategic planning It also reviews the standard IS topics of system analysis and database design covering the whole spectrum of databases and all the major methods and techniques of database design The role of IS as a technological innovation in the knowledge economy is also analyzed In doing so new concepts such as basic values of IS systems of IS sustainability of IS IS as a service system IS as a human value network and the hyper network model for innovation by IS are developed

From Products to Services Laurie Young, 2008-05-05 During the last thirty years a wide range of product companies throughout the Western economies have considered moving into or setting up service businesses Some have rejected the idea after careful consideration some have wandered into competitive services without any real idea of what is involved and others have deliberately executed a carefully considered strategic manoeuvre Included in this debate are some of the most famous business names in the western world Unisys Ericsson Michelin Nokia and HP For IBM it was Lou Gerstener's big bet at GE it was one of former CEO Jack Welch's four major strategies and at General Motors the financial services arm was its most profitable business for many years Yet very little has been published on this profound transition As a result myths and idiocies abound Some routinely claim that the evolution from products through services to solutions is inevitable Others think that manufacturing is being outsourced to China and India while American or European teenagers face a career in hamburger stalls The truth is much more fascinating To succeed in a service business most functions of a product company need to change Operations management recruitment finance sales new product development and marketing must all be adjusted So the move into service therefore involves huge risk caused by disruptive and radical change What has pushed realistic business people in such widely different industrial sectors to take so large a risk Does their experience contain lessons or warnings for others Is the trend likely to continue and affect other parts

of the world as their economies develop Will India China or other developing economies need to learn how to export service once their manufacturing industries mature Written by a successful businessman who has been at the heart of these changes in several companies and with case studies from companies like IBM Unilever BT Michelin Ericsson and Nokia this book explores the experience of those who have made the transition and some who have resisted it It covers in depth subjects such as strategic focus change management service operations branding a service business service sales and service marketing It is the first major work on this subject This book is a must read for those considering the plunge into service growth and innovation Even those companies that have already taken the plunge will gain fresh perspective Jim Spohrer Director IBM Almaden Research Centre USA Laurie Young details in very practical ways the reasons and methodologies for change I would recommend this book to every one of my customers Douglas Morse Managing Principal for the Services Transformation and Innovation Group LLC I am thrilled with the publication of this much needed book In my work with businesses around the globe I find that grappling with the challenge of transforming a company from products to services is a compelling priority for increasing numbers of firms Stephen W Brown PhD Carson Chair Professor and Executive Director Center for Services Leadership W P Carey School of Business Arizona State University
