Beard, 2015-06-24 Excerpt from Ophthalmic Surgery a Treatise on Surgical Operations Pertaining to the Eye and Its Appendages With Chapters on Para Operative Technic and Management of Instruments The selection of the matters discussed in the following pages and the manner of treating them are the results of the careful study and practical application of the involved principles made in hospitals dispensaries and in private practice extending over a period of twenty six years They began while the author was a student under Agnew and Knapp in 1883 were later continued in England and on the Continent of Europe and have ever since been diligently prosecuted There has been no separate work on the surgery of the eye published in the United States for nearly half a century and but little written upon the subject in connection with the more general treatises on ophthalmology if we except the admirable contribution of Knapp to the System of Norris and Oliver some twelve years ago The object here has been to supply a work that would embody not only what experience has taught and judgment prompted as being the more valued measures of all countries but in particular those of our own country The presentation of portions devoted to the history of the different procedures is deemed of great importance but to keep them from appearing obtrusive they have been made as concise as practicable The classification followed has seemed the logical one to adopt The chapter on the extraction of foreign bodies from the interior of the eye has been placed in a class of its own instead of with the operations upon the globe About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      *Ophthalmic Surgery* George L. Spaeth, 2003 This resource provides a convenient single volume introduction to the surgical techniques that should be part of the armamentarium of all comprehensive ophthalmologists This book can serve as a checklist for residents as they go through their training and it can also be a useful shelf reference for an ophthalmologist who handles a wide variety of

surgical cases with a broad based practice Chapters written by leading authorities cover indications details of surgical techniques recognition and management of complications and related issues Discusses packo chop laser peripheral iridoplasty the underfiltering bleb blepharoplasty strabismus proliferative diabetic retinopathy and much more
