Pampaloni,Choudhury,Kerr,Njoku,2023-05-31 Recent advances in theory and observations using passive microwave remote sensing have highlighted the potential of spaceborne sensors for contributing to the required land surface measurements of soils vegetation snow cover and precipitation Furthermore the spatial resolution of passive microwave observations matches the special scales of large scale models of land atmosphere interactions both for data assimilation and validation In order to stimulate and focus this research a workshop sponsored by ESA and NASA was organized to review the state of the art in microwave radiometry related to land applications and to exchange ideas leading into new directions for future research This volume contains the refereed papers from the aforementioned ESA NASA workshop which are arranged by topic as well as the edited working group reports Passive Microwave Remote Sensing of Land-Atmosphere Interactions Bhaskar J.

**Use and Agriculture** Manoj Shukla,2011 Agriculture is strongly affected by changes in soil hydrology as well as changes in land use and management practices and the complex interactions between them This book aims to develop an understanding of these interactions on a watershed scale using soil hydrology models and addresses the consequences of land use and management changes on agriculture from a research perspective It includes case studies that illustrate the impact of land use and management on various soil hydrological parameters under different climates and ecosystems It is suitable for researchers and students in soil sc Comprehensive Remote Sensing Shunlin Liang,2017-11-08 Comprehensive Remote

Sensing Nine Volume Set covers all aspects of the topic with each volume edited by well known scientists and contributed to by frontier researchers It is a comprehensive resource that will benefit both students and researchers who want to further their understanding in this discipline The field of remote sensing has quadrupled in size in the past two decades and increasingly draws in individuals working in a diverse set of disciplines ranging from geographers oceanographers and meteorologists to physicists and computer scientists Researchers from a variety of backgrounds are now accessing remote sensing data creating an urgent need for a one stop reference work that can comprehensively document the development of remote sensing from the basic principles modeling and practical algorithms to various applications Fully comprehensive coverage of this rapidly growing discipline giving readers a detailed overview of all aspects of Remote Sensing principles and applications Contains Layered content with each article beginning with the basics and then moving on to more complex concepts Ideal for advanced undergraduates and academic researchers Includes case studies that illustrate the practical application of remote sensing principles further enhancing understanding Land Surface Evaporation Thomas J.

Schmugge,Jean-Claude Andre,2012-12-06 General circulation model GCM experiments in the late 1970 s indicated that the climate is sensitive to variations in evaporation at the land surface Thus in the context of climate modeling it became important to develop techniques which would realistically estimate the evaporation flux on land Land Surface Evaporation Measurement and Parameterization discusses strategies for the use of experimental data in developing and testing parameterization schemes of the evaporation flux in GCM s The book reviews state of the art techniques such as remote sensing which measure evaporation fluxes over continental surfaces It evaluates their relevance with respect to the various spatial and temporal scales of interest This book will provide researchers in climatology meteorology hydrology and water management and remote sensing with a thorough overview of current research in land surface evaporation It will also give young scientists insight into surface processes Scaling Up in Hydrology Using Remote Sensing J.
