

PDF Filler

PDF Filler is a software application designed to fill PDF documents with placeholder text. It is used for testing and development purposes, allowing users to quickly generate PDF files with realistic content for testing their applications. The software typically provides options to select the number of pages, the amount of text, and the font style and size. It can also be configured to insert specific keywords or data into the document. The generated PDFs are often used to simulate user input and ensure that the application can handle various document structures and content lengths.
