**The Year without a Purchase** Scott Dannemiller,2015-08-04 The Year without a Purchase is the story of one family's quest to stop shopping and start connecting. Scott Dannemiller and his wife Gabby are former missionaries who served in Guatemala. Ten years removed from their vow of simple living, they found themselves on a never ending treadmill of consumption where each purchase created a desire for more and never led to true satisfaction. The difference between needs and wants had grown very fuzzy and making that distinction clear again would require drastic action. No nonessential purchases for a whole year. No clothes, no books, no new toys for the kids. If they couldn't eat it or use it up within a year, toilet paper and shampoo for example, they wouldn't buy it. Filled with humorous wit, curious statistics and poignant conclusions, the book examines modern America's spending habits and chronicles the highs and lows of dropping out of our consumer culture. As the family bypasses the checkout line to wrestle with the challenges of gift giving, child rearing and keeping up with the Joneses, they discover important truths about human nature and the secret to finding true joy. The Year without a Purchase offers valuable food for thought for anyone who has ever wanted to reduce stress by shopping less and living more.

Bolker, Maura B. Mast, 2016-05-04 Common Sense Mathematics is a text for a one semester college level course in quantitative literacy. The text emphasizes common sense and common knowledge in approaching real problems through popular news items and finding useful mathematical tools and frames with which to address those questions. We asked ourselves what we hoped our students would remember about this course in ten years' time. From that ten year perspective, thoughts about syllabus, what topics should we cover, seemed much too narrow. What matters more is our wish to change the way our students' minds work, the way they approach a problem or more generally the way they approach the world. Most people skip the numbers in newspapers, magazines, on the web and, more importantly, even in financial information. We hope that in ten years our students will follow the news, confident in their ability to make sense of the numbers they find there and in their daily lives. Most quantitative reasoning texts are arranged by mathematical topics to be mastered. Since the mathematics is only a part of what we hope students learn, we've chosen another strategy. We look at real life stories that can be best understood with careful reading and a little mathematics. **Marketing Science**, 1994
