In this era of rapid technological advancements and complex global challenges, including a shortage of qualified STEM educators and under-resourced schools, STEM education is essential. It equips individuals with critical skills for success through collaborative and interdisciplinary approaches. The asterisk in STEM reflects its evolving nature, promoting interdisciplinary collaboration to develop critical skills needed in a rapidly changing technology-driven world. The scope of the book is multi-faceted and explores a range of practices and research contexts such as student STEM, stimulated experiences, transdisciplinarity, diversity, and inclusion in STEM education and science teaching in primary and secondary schools.
