As you work through each stage of development, you'll develop an understanding of how these models can be customized, applied, and integrated for impressive multimodal AI. *Build a Text to Image Generator from Scratch* teaches you how to build and train models to generate high-resolution images based on text descriptions; edit an existing image based on text prompts; build and train a model to add captions to images; build and train a vision transformer to classify images; fine-tune LLMs for downstream tasks such as classification, text or image generation; better differentiate real images from deepfakes. About the technology, AI-generated images appear everywhere from high-end advertising to casual social media feeds. Text-to-image tools like Dall-e, Midjourney, and Flux make it easy to create AI art, but how do they work? In this book, you'll find out by building your own text-to-image generator. About the book, *Build a Text to Image Generator from Scratch* explores both transformer-based image generation and diffusion models. You'll work hands-on to build a pair of simple generation models that can classify images automatically, add captions, reconstruct images, and enhance existing graphics.
