of negative rates in Europe and Japan and highlights how this has contributed to profound economic insecurity and financial fragility Chancellor reveals how extremely low interest rates not only create asset price inflation but are also largely responsible for weak economic growth rising inequality zombie companies elevated debt levels and the pensions crises that have afflicted the West in recent years conditions under which economies cannot possibly thrive At the same time easy money in China has inflated an epic real estate bubble accompanied by the greatest credit and investment boom in history As the global financial system edges closer to yet another crisis Chancellor shows that only by understanding interest can we hope to face the challenges ahead
