DO NOT SMOKO, DO NOT USE FLAMES, DO NOT CAUSE SPARKS, WHEN EASILY INFLAMMABLE MATERIALS ARE HANDLED.

- In case of interventions outside the workshop, position the truck on a flat surface if possible and check it. If work on a slope is unavoidable, block the truck first and then move it to a level area as soon as possible with a certain degree of safety.
- Disconnect the batteries and label all the controls to signal that an intervention is taking place. Block the truck as well as every attachment that has to be lifted.
- Use only the prescribed attachment points when lowering and make sure the disarranged pins and/or bolts are locked before pulling. Lift and handle all heavy parts by means of a lifting device with the suitable capacity. Use the lifting systems arranged for the purpose. Pay attention to the ground near the load that has to be lifted.
- Avoid loading chains or wire ropes.
- Beware of the chains, of heat or damaged ropes: do not use them while lifting or pulling. To handle them, always make use of safety gloves.
- Handle all parts carefully. Never put your hands or fingers in between parts.
- Wear the special personal safety clothes such as safety glasses, gloves and shoes.
- The dust when maintenance operations are carried out must be removed by clean and dry. Clean up any water or oil spills immediately.
- Do not give grease or oil-soaked clothes. They represent a serious fire risk. Always put them in a closed metal container.
- Never carry out any maintenance operation on the machine with anyone sitting in the seat, unless the operator is fully trained and involved in the operation to be carried out.
- When using compressed air to clean parts, always wear safety glasses with side shields.

Insulating

- When working operations are required, use the safety clothing provided: dark glasses, helmets, overalls, gloves and shoes. The dark glasses should also be worn by anyone in the nearby area during a welding operation even if not performing the work.

Never look at the welding arc without properly protecting your eyes.

Battery

- If you have to use batteries, remember the cables should be connected to the terminals as specified (+) with (+) and (-) with (-).

Avoid short-circuiting the terminals.

The gas released from the batteries is highly inflammable. During recharging, leave the battery compartment uncovered to ensure more effective ventilation and remove the caps.

Avoid SPARKS OR FLAMES ON THE BATTERY AREA

- Never check the state of charge of the batteries using "bridges" obtained by placing metal objects on the terminals.
- Before any service operation, check that no parts are shorted.
- Always disconnect the battery before carrying out any intervention on the electric system.

For the battery chargers and similar equipment use only auxiliary power supply sources having an efficient earth connection to avoid possible electric shocks.

Hydraulic System

- A fluid escaping through a very small hole may be almost invisible and be sufficiently strong to penetrate beneath the skin. If this happens use a piece of card or wood. **Never use your hands.**

Use the special-purpose equipment to check hydraulic pressure.
