Chan, 2014-07-16 **Optic Nerve Disorders** Diagnosis and Management, Second Edition is a thoroughly revised and updated reference including new information on diagnostic techniques such as genetic testing for hereditary optic neuropathies, new data on toxic drug-related optic neuropathies, and recent data from clinical trial studies. Additional novel therapies including stem cell therapies, the use of nanotechnology, and gene therapies are featured highlights as is spectral domain optical coherence tomography (OCT) for imaging of the optic nerve. The way in which OCT is used in differentiating optic nerve disorders from other retinal disorders and how OCT is used in monitoring the course of the disease is also discussed. This practical reference focuses on common optic nerve disorders. It addresses diagnosis, pathophysiology, management, and prognosis and is written in a clear, concise style for quick, easy reference in the clinic. With additional color photographs to better illustrate the material, the second edition will prove to be the go-to reference for ophthalmologists, neurologists, and neurosurgeons working with optic nerve disorders.

Ferreri, 2019-02-13 The optic nerve is a primary reference for those ophthalmologists and researchers interested in its anatomy and physiology in the most recent diagnostic techniques as well as in the clinical management of optic nerve disorders. The book provides a detailed description of the structure and functioning of the optic nerve and attempts at clarifying how anomalies in its development are related with tumor development. The book surveys the most recent diagnostic techniques such as spectral domain optical coherence tomography and highlights how these techniques can be employed to evaluate optic nerve layers as well as lesions compressing the visual pathway. Practical references to optic nerve drusen and the changes in the optic nerve due to diabetic retinopathy are also presented. The book is written in a concise fashion and aims at being a major reference to a broad audience including students, ophthalmologists, consultants, neurologists, researchers, and surgeons concerned with optic nerve diseases.
