[Data, Disruption & Digital Leadership](#) Philipp Futterknecht,Tobias Hertfelder,2023-07-28 Since the theory of relativity we know that massive objects attract things by their gravitation The greater the mass the greater the force of attraction It is the same in strategy projects Each project participant is a massive participant and has an impact on the interaction What has changed dramatically is the influence of data on this process Those who do not take this into account will suffer enormous losses in the future As this change creates a new equilibrium the chances of success of the methods and behaviors used also change In this book you will learn how to master this change and what you need to do so

Richards,2022-01-06 Remote Sensing Digital Image Analysis provides a comprehensive treatment of the methods used for the processing and interpretation of remotely sensed image data Over the past decade there have been continuing and significant developments in the algorithms used for the analysis of remote sensing imagery even though many of the fundamentals have substantially remained the same As with its predecessors this new edition again presents material

that has retained value but also includes newer techniques covered from the perspective of operational remote sensing. The book is designed as a teaching text for the senior undergraduate and postgraduate student and as a fundamental treatment for those engaged in research using digital image analysis in remote sensing. The presentation level is for the mathematical non specialist. Since the very great number of operational users of remote sensing come from the earth sciences communities the text is pitched at a level commensurate with their background. The chapters progress logically through means for the acquisition of remote sensing images techniques by which they can be corrected and methods for their interpretation. The prime focus is on applications of the methods so that worked examples are included and a set of problems conclude each chapter. **NBS Monograph**, 1970 Scientific and Technical Aerospace Reports, 1978 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.
