**Formalizing Data-Centric Web Services** Iman Saleh, 2015-11-04 This book presents a methodology to model and specify the data aspect of Web services as it is overlooked by current standards for specifying Web services. The formal specification enables verification of service behavior and the proposed methodology is based on formal methods and design by contract techniques. The Web has evolved from an information sharing medium to a wide scale environment for sharing capabilities or services. Currently URLs not only point to documents and images but are also used to invoke services that potentially change the state of the Web. Major online organizations today such as Amazon, PayPal and FedEx provide services for users and consumers. They also allow third party vendors to resell their services. In both cases this requires precise and complete specification of service offerings. Several online discussions demonstrate the challenges faced by these organizations and others while describing their data centric Web services. These challenges surrounding data specification can lead consumers to use a service erroneously. Case studies demonstrate how formal methods and specifically design by contract techniques can be leveraged to address the lack of formal specification of data when it comes to developing Web applications such as Amazon and PayPal.

**Design and Development of Web Information Systems** Klaus-Dieter Schewe, Bernhard Thalheim, 2019-04-01 This book describes the research of the authors over more than a decade on an end to end methodology for the design and development of Web Information Systems (WIS). It covers syntactics, semantics and pragmatics of WIS, introduces sophisticated concepts for conceptual modelling, provides integrated foundations for all these concepts and integrates them into the co design method for systematic WIS development. WIS, i.e. data intensive information systems that are realized in a way that arbitrary users can access them via web browsers, constitute a prominent class of information systems for which acceptance by its a priori unknown users in varying contexts with respect to the presented content, the ease of functionality provided and the attraction of the layout adds novel challenges for modelling, design and development. This book is structured into four parts. Part I Web Information Systems: General Aspects gives a general introduction to WIS, describing the challenges for their development and provides a characterization by six decisive aspects: intention, usage, content, functionality, context and presentation. Part II High Level WIS Design: Strategic Analysis and Usage Modelling with Storyboarding introduces methods for high level design of WIS, covering strategic aspects and the storyboard method which is discussed from syntactic, semantic and pragmatic perspectives. Part III Conceptual WIS Design: Rigorous Modelling of Web Information Systems and their Layout with Web Interaction Types and Screenography continues with conceptual design of WIS, including layout and playout. This introduces the decisive web interaction types, the screenography method and adaptation aspects. The final Part IV Rationale of the Co Design Methodology and Systematic Development of Web Information Systems describes the co design method for WIS development and its application for the systematic engineering of systems. The book addresses the research community and at the same time can be used for

education of graduate students and as methodological support for professional WIS developers For the WIS research community it provides methods for WIS modelling on all levels of abstraction including theoretical foundations and inference mechanisms as well as a sophisticated end to end methodology for systematic WIS engineering from requirements elicitation over conceptual modelling to aspects of implementation layout and playout For students and professional developers the book can be used as a whole for educational courses on WIS design and development as well as for more specific courses on conceptual modelling of WIS WIS foundations and reasoning co design and WIS engineering or WIS layout and playout development
