and acting as embedded in particular environments and directs them to think about the functional nature of these systems. The overall effect is an especially readable authoritative text on Sensation Perception and Action that really brings this fascinating topic to life.

The Measurement of Sensation Donald Richard John Laming, 1997. The publication in 1957 of S. S. Stevens' famous paper "On the psychophysical law" ignited a controversy which has continued ever since relating to people's subjective judgements of physical reality. Why is it that the perception of sensation can diverge so sharply from the magnitude of the stimulus? How should sensation be measured? Donald Laming brings together a diversity of ideas and a wealth of experimental evidence and provides a challenging new perspective on the question which has fragmented the research community for nearly 40 years.

Levine & Shefner's Fundamentals of Sensation and Perception Michael W. Levine, 2000. The new edition of this successful book provides a comprehensive and authoritative overview of the sensory systems: vision, audition, touch, taste, and smell. In each case, the neural machinery relating sensation and perception is described and integrated with the physiological underpinning. This edition includes a CD which provides demonstrations and simulations to explain and clarify the perceptual phenomena.

Sensation and Perception Steven Yantis, 2013-02-11. Like no other textbook for the course, it integrates classic and current research, including the latest developments in cognitive neuroscience and brain imaging, into a highly accessible portrait of the field's defining principles and experiments. Engagingly written, filled with outstanding art, including 3D images and supported by dozens of interactive visual demonstrations devised by the author, it is your students' gateway to the forefront of research in sensation and perception.

Sensation and Perception Harvey Richard Schiffman, 1995-11-24. How do the senses gather and secure information about the outside world? This book addresses this basic question by explaining how the physical world interacts with and stimulates the senses, in turn how the senses and the nervous system transform, integrate, and process the stimulation.

Fundamentals of Sensation and Perception Michael W. Levine, Jeremy M. Shefner, 1991-12. Intended for courses in sensation and perception, this book covers the anatomy, physiology, and phenomenology of the way humans sense and perceive the world.
