Set-101+10 New Science Experiments Ivar Utial, Mahal Pustak, 2007-09 This book provides examples of the many simple activities children can do. It might even inspire them to make up their own experiments to see why and how things turn out the way they do. We can use this book to have fun with our children while they learn and see how they enjoy the wonderful world of science. **Janice VanCleave's Great Science Project Ideas from Real Kids** Janice VanCleave, 2006-09-30

There's plenty for you to choose from in this collection of forty terrific science project ideas from real kids chosen by well-known children's science writer Janice VanCleave. Developing your own science project requires planning, research, and lots of hard work. This book saves you time and effort by showing you how to develop your project from start to finish and offering useful design and presentation techniques. Projects are in an easy-to-follow format, use easy-to-find materials, and include dozens of illustrations and diagrams that show you what kinds of charts and graphs to include in your science project and how to set up your project display. You'll also find clear scientific explanations, tips for developing your own unique science project, and 100 additional ideas for science projects in all science categories. **The Really Useful Book of Secondary Science Experiments** Tracy-ann Aston, 2017-07-31

How can a potato be a battery? How quickly will a shark find you? What food should you take with you when climbing a mountain? The Really Useful Book of Secondary Science Experiments presents 101 exciting real-world science experiments that can be confidently carried out by any KS3 science teacher in a secondary school classroom. It offers a mix of classic experiments together with fresh ideas for investigations designed to engage students, help them see the relevance of science in their own lives, and develop a passion for carrying out practical investigations. Covering biology, chemistry, and physics topics, each investigation is structured as a problem-solving activity, asking engaging questions such as: How can fingerprints help solve a crime? or Can we build our own volcano? Background science knowledge is given for each experiment, together with learning objectives, a list of materials needed, safety and technical considerations, detailed method ideas, for data collection, advice on how to adapt the investigations for different groups of students, useful questions to ask the students, and suggestions for homework. Additionally, there are ten ideas for science-based projects that can be carried out over a longer period of time, utilising skills and knowledge that students will develop as they carry out the different science investigations in the book. The Really Useful Book of Secondary Science Experiments will be an essential source of support and inspiration for all those teaching in the secondary school classroom, running science clubs, and for parents looking to challenge and excite their children at home. **Ace Your Science Project Using Chemistry Magic and Toys** Robert Gardner, 2009-08-01
