Changing Media, Homes and Households Deborah Chambers, 2016-04-14 Media technologies have played a central role in shaping ideas about home life over the last two centuries. *Changing Media Homes and Households* explores the complex relationship between home, householders, families and media technologies by charting the evolution of the media-rich home from the early twentieth century to the present. Moving beyond a narrow focus on media texts, production and audiences, Deborah Chambers investigates the physical presence of media objects in the home and their symbolic importance for home life. The book identifies the role of home-based media in altering relationships between home, leisure, work and the outside world in the context of entertainment, communication and work. It assesses whether domestic media are transforming or reinforcing traditional identities and relations of gender, generation, class and migrancy. Mediatisation theory is employed to assess the domestication of media and media saturation of home life in the context of wider global changes. The author also develops the concept of media imaginaries to explain the role of public discourses in shaping changing meanings, values and uses of domestic media. Framed within these approaches, four chapters also provide in-depth case studies of the processes involved in media's home adoption: early television, design, family centred video gaming, the domestication of tablet computers and the shift from smart homes to today's connected homes. This is an ideal text for students and researchers interested in media and cultural studies, communication and sociology.

The De Gruyter Handbook of Automated Futures Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23 How does automation affect us, our environment and our imaginations? What actions should we take in response to automation? Beyond grand narratives and technology-driven visions of the future, what more can automation offer? With these questions in mind, *The De Gruyter Handbook of Automated Futures* provides a framework for thinking about and implementing automation differently. It consolidates automated futures as an interdisciplinary research field, embedding the imaginaries, interactions and impacts of automation technology within their social, historical, societal, cultural and political contexts. Promoting a critical yet constructive and engaging agenda, the handbook invites readers to collaborate with, rather than resist, automation agendas. It does so by pushing the agenda for social science, humanities and design beyond merely assessing and evaluating existing technologies. Instead, the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems. Methodologically, the handbook is underpinned by a pedagogical approach to staging co-learning and co-creation of automated futures, with rather than simply for people. In this way, the handbook encourages readers to explore new and alternative modes of research, fostering a deeper

engagement with the evolving landscape of automation *Health Promotion and Aging* David Haber, 2013-03-21 Praise for the fifth edition I applaud Dr Haber for addressing key concepts and issues in health promotion and aging and making them accessible respectful mindful and empowering Marilyn R Gugliucci PhD Director Geriatrics Education and Research University of New England Past President AGHE David Haber has done it again A must have for students and faculty alike Barbara Resnick PhD CRNP FAAN Substantially revised and updated the sixth edition of this classic text continues to define healthy aging by illustrating how to prevent disease and make large scale improvements toward health and wellness New to this edition is current information regarding the future of Medicare Social Security and the Affordable Care Act information about the Healthy People 2020 initiative supported with examples up to date and comprehensive medical screening recommendations and an extensive review of new developments in complementary and alternative medicine geriatric mental health community health and public health policy A new section on technology and aging is also included as well as an instructor s manual The text synthesizes current research findings with practical applications and includes detailed and updated descriptions of the author s own programs that have been recognized by the National Council on the Aging s Best Practices in Health Promotion and Aging New to this Edition Up to date coverage of the future of Medicare Social Security the Affordable Care Act and the Healthy People 2020 initiative New section on technology and aging Current developments in complementary and alternative medicine New findings regarding geriatric physical and mental health and community health Current information about exercise nutrition and weight management Updated information on public health policy Current trends in long term care and end of life care Updated sociodemographic trends Instructor s manual
