Ogunbayo, Clinton O. Aigbavboa, 2025-11-24 The central aim of this book is to focus on safety incentives in a construction context and conceptualise an adaptive safety incentive framework for construction firms in the global south. This book is a collection of knowledge on safety incentives and their impact on improving workplace safety, motivating workers' safety practices and improving organisations' performance goals in the construction industry. With primary research conducted in Nigeria and secondary comparisons with Ghana, South Africa, China, Malaysia and Hong Kong, the conceptualised framework provides insights into the multifaceted factors influencing safety incentives in the construction sector. By explaining the behavioural approach to creating reward systems that minimise unintended consequences and maximise happiness, health, wealth and success, this book takes a pragmatic approach to developing safety incentives and provides significant practical insights. This book identifies the gaps in safety incentives studies by critically reviewing related models, theories and conceptual models to provide significant recommendations that support the implementation of safety incentives in the construction industry in the global south. Guiding readers on templates for developing safety incentives, this book will interest professionals in building construction, project management, quantity surveying, civil engineering, human resource management, studies and occupational safety and health (OSH) and owners of construction organisations as well as researchers in all these fields.

**The Arctic in China's National Strategy** Martin Kossa, 2024-02-02 This book locates the Arctic within the context of the People's Republic of China's PRC national strategy of the Great Rejuvenation of the Chinese Nation. Drawing on a range of sources published in Chinese and English, the author analyses Beijing's Arctic scientific activities and technological capabilities, including the research infrastructure, long-term goals and the significance for China's understanding of the region, its Arctic identity and international perceptions. Examining the region from the perspective of the Comprehensive National Security Outlook developed during the Xi Jinping era, the book focuses on military, economic, technological and political components and considers the PRC's official and academic discourses and the views of the region within bilateral relations with Arctic states, outlining a science, security and governance nexus in China's Arctic engagement. This volume will be of interest to scholars and students of Arctic geopolitics, Chinese studies, security studies and foreign policy analysis. It will also appeal to policymakers and defence analysts in Arctic states and other regional stakeholders.

**Sleeping Dogs** Andrew McDougall, 2023-08-31 What happened to the Quebec sovereignty movement after 1995? In *Sleeping Dogs*, Andrew McDougall reveals how a change in federalist strategy combined with an improving political context helped Canada stabilize its federal system and bury the Quebec question for the foreseeable future. The book identifies five

potential reasons the Quebec sovereignty movement lost momentum and argues that all contributed to a political environment that benefited federalists McDougall explores topics of elite accommodation generational change changing identity politics economic globalization and constitutional fatigue He argues that Canada's federalist political elites have capitalized on these developments to stabilize the country by dropping the national question even when they might still hold very different visions of the Constitution Building on constitutional abeyance theory the author conceives of this strategic change as the restoration of a constitutional abeyance among federalist actors Considering recent history in light of subsequent developments *Sleeping Dogs* is a timely and important attempt to understand the evolving situation in Quebec and Canadian federalism
