 current fiscal year and the projected activities for the succeeding fiscal year **Secondary School External Examination**
Systems Barend Vlaardingerbroek, Neil Taylor, 2009 Summative assessment has been a contentious issue in educational
 circles for several decades particularly high stakes assessment events which arise at various junctures of the school cycle
 especially those at the end of it The French Baccalaureat and English A Levels and their numerous clones throughout the
 francophone and anglophone worlds are household names and represent milestone events in people's lives as their outcomes
 are principal determinants of young people's future prospects These examinations are external they are devised conducted
 and processed by agencies outside the schools usually ministerial examination units As such they act as blind arbiters of
 student achievement providing the proverbial level playing field which ensures the comparability of outcomes In the
 pyramidal school structures of yesteryear examinations acted as filters regulating the progression of pupils to subsequent
 tiers of formal education Exit points occurred from primary school level up from where unsuccessful candidates could enter
 the labour force and or embark on occupationally specific further education and training With the modernisation of the
 labour market and an ever higher social demand for access to higher levels of formal education the filtering function of
 examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper
 secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of
 terminating assessment systems including the modification and in some instances abandonment of external examinations
 This edited volume brings together the experiences of twenty examination systems from around the world to show how these
 dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P
 Heyneman of World Bank repute there are sixteen chapters presenting Country Case Studies which have been written up
 under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The
 subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution

by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics
