**Women Writers in Postsocialist China** Kay Schaffer, Xianlin Song, 2013-07-31 What does it mean to read from elsewhere Women Writers in Postsocialist China introduces readers to a range and variety of contemporary Chinese women's writing which has seen phenomenal growth in recent years The book addresses the different ways women's issues are understood in China and the West attending to the processes of translation adaptation and the grafting of new ideas with existing Chinese understandings of gender feminism subjectivity consumerism and post modernism By focusing on women's autobiographical biographical fictional and historical writing the book engages in a transcultural flow of ideas between western and indigenous Chinese feminisms Taking account of the accretions of social cultural geographic literary economic and political movements and trends cultural formations and ways of thinking it asks how the texts and the concepts they negotiate might be understood in the social and cultural spaces within China and how they might be interpreted differently elsewhere in the global locations in which they circulate The book argues that women centred writing in China has a direct bearing on global feminist theory and practice This critical study of selected genres and writers highlights the shifts in feminist perspectives within contemporary local and global cultural landscapes *The Art of Seeing Beyond Oneself* Doil Kim, 2025-12-17 This book offers a philosophical reconstruction of Confucian humility a virtue deeply rooted in East Asian traditions yet often overlooked or conflated with Western and contemporary notions of modesty and humility It bridges classical textual analysis with insights from cultural psychology and comparative philosophy to clarify its distinctive nature and broader ethical significance In contemporary discourse self lowering is often mistaken for self effacement or undue self sacrifice Confucian humility conceived as a distinctive mode of self lowering presents a different vision it cultivates a form of personhood that resists self centered impulses and fosters genuine attention to others enabling deeper connection across relationships communities and the broader world Far from being a relic of the past Confucian humility offers a timely response to the rise of extreme individualism egoism and the ethos of isolated survival shaped by relentless competition and the imperative of self commodification in contemporary society Provided by publisher **Second Language**

Kemmerer,2014-11-20 Language is one of our most precious and uniquely human capacities so it is not surprising that research on its neural substrates has been advancing quite rapidly in recent years Until now however there has not been a single introductory textbook that focuses specifically on this topic Cognitive Neuroscience of Language fills that gap by providing an up to date wide ranging and pedagogically practical survey of the most important developments in the field It guides students through all of the major areas of investigation beginning with fundamental aspects of brain structure and function and then proceeding to cover aphasia syndromes the perception and production of speech the processing of language in written and signed modalities the meanings of words and the formulation and comprehension of complex expressions including grammatically inflected words complete sentences and entire stories Drawing heavily on prominent theoretical models the core chapters illustrate how such frameworks are supported and sometimes challenged by experiments employing diverse brain mapping techniques Although much of the content is inherently challenging and intended primarily for graduate or upper level undergraduate students it requires no previous knowledge of either neuroscience or linguistics defining technical terms and explaining important principles from both disciplines along the way
