Your nervous system is the master control system of your body. Through your nervous system you coordinate all your body's functions and movements, adapt to stress, sense the world, think, feel and express emotion. Your nervous system keeps you alive and healthy.

## YOUR NERVOUS SYSTEM IS:

## Subluxations:

-  are areas of tension, altered motion, or spinal misalignment that can interfere with nervous system function
-  they can affect the functions of your body well before spinal pain or discomfort is noticed
-  research indicates that pressure equal to the weight of a 10c piece can alter the information flow along a nerve by up to 50%
-  Your spine, when moving well, free from subluxations, is central to the optimum health and wellbeing of your body and mind

**What's Your Handicap?** Gordon Davies,2015-04-14 When stroke comes into your life it often comes without warning or at least without recognizable warning Its impact is often devastating Even the most resourceful families will often find

themselves at sea when it comes to knowing what to do They will need to make major decisions while under considerable stress and often in the absence of information This of course is never a winning combination When my big one came it wasnt entirely unexpected Id had some warning signs but doctors werent able to predict when or if it would occur One day I was living the life of an international consultant just as likely to find myself in Nairobi as in Washington or Ottawa the next day I was flat on my back in the IC room of the local general hospital I had no idea that this was the first day of my new life or that I would spend the next year of my life in hospital But while my life has completely changed I wouldnt want you to think that its been only for the worse Far from it I had my stroke twenty years ago and I know that things are better now but Im not sure that theyve improved that much I was fortunate in that I had a very resourceful family but in spite of this I know that they had a great deal of difficulty finding useful information There was a need then and I believe there is a need now for information to be centralized and accessible At the time of my stroke a reasonable amount of medical information was available but it was spread all over the map The amount of available information on stroke recovery however was only minimal Unless one of your caregivers or friends was the sort of person who was curious and went out of his or her way to become involved in your rehabilitation program you were left swimming in a sea of ignorance The Catholic University Bulletin Catholic University of America, 1895 **International Record of Medicine and General Practice Clinics** Frank Pierce Foster, 1885 **Technical Reports of the National Highway Traffic Safety Administration** United States.
