Neurons in Action John W. Moore,Ann E. Stuart,2007 Neurons in Action 2 is the second version of a unique CD ROM based learning tool that combines hyperlinked text with NEURON simulations of laboratory experiments in neurophysiology Version 2 features nine new tutorials introducing new channel types single channel simulations and a redesigned interface Neurons in Action s moving graphs provide insight into nerve function that is simply not possible with conventional static text and figure presentations Students discover how changing parameters such a neuronal geometry ion concentrations ion channel densities and degree of myelination affects the generation of action potentials synaptic potentials and the spread or propagation of voltages within a neuron For instructors minimovies of NEURON simulations are provided for use in lectures
