*Africa regional overview of food security and nutrition 2020* Food and Agriculture Organization of the United Nations,United Nations Economic Commission for Africa,African Union Commission,2021-06-29 Africa is not on track to meeting the Sustainable Development Goal SDG 2 targets to end hunger and ensure access by all people to safe nutritious and sufficient food all year

round and to end all forms of malnutrition The number of hungry people on the continent has risen by 47.9 million since 2014 and now stands at 250.3 million or nearly one fifth of the population The 2017, 2018 and 2019 editions of this report explain that this gradual deterioration of food security was due to conflict, weather extremes and economic slowdowns and downturns often overlapping A continued worsening of food security is expected also for 2020 as a result of the COVID-19 pandemic In addition to hunger across all countries in Africa, millions of people suffer from widespread micronutrient deficiencies and overweight and obesity are emerging as significant health concerns in many countries This report shows that the food system in Africa does not provide food at a cost that makes nutritious food affordable to a majority of the population and this is reflected in the high disease burden associated with maternal and child malnutrition, high body mass, micronutrient deficiencies and dietary risk factors The report also shows that current food consumption patterns impose high health and environmental costs which are not reflected in food prices The findings presented in this report highlight the importance of prioritizing the transformation of food systems to ensure access to affordable and healthy diets for all produced in a sustainable manner

**The State of Food Security and Nutrition in the World 2020** Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, World Food Programme, World Health Organization, The United Nations Children's Fund, 2020-07-01

Updates for many countries have made it possible to estimate hunger in the world with greater accuracy this year In particular, newly accessible data enabled the revision of the entire series of undernourishment estimates for China back to 2000, resulting in a substantial downward shift of the series of the number of undernourished in the world Nevertheless, the revision confirms the trend reported in past editions: the number of people affected by hunger globally has been slowly on the rise since 2014 The report also shows that the burden of malnutrition in all its forms continues to be a challenge There has been some progress for child stunting, low birthweight and exclusive breastfeeding but at a pace that is still too slow Childhood overweight is not improving and adult obesity is on the rise in all regions The report complements the usual assessment of food security and nutrition with projections of what the world may look like in 2030 if trends of the last decade continue Projections show that the world is not on track to achieve Zero Hunger by 2030 and despite some progress, most indicators are also not on track to meet global nutrition targets The food security and nutritional status of the most vulnerable population groups is likely to deteriorate further due to the health and socio-economic impacts of the COVID-19 pandemic The report puts a spotlight on diet quality as a critical link between food security and nutrition Meeting SDG 2 targets will only be possible if people have enough food to eat and if what they are eating is nutritious and affordable The report also introduces new analysis of the cost and affordability of healthy diets around the world by region and in different development contexts It presents valuations of the health and climate change costs associated with current food consumption patterns as well as the potential cost savings if food consumption patterns were to shift towards healthy diets that include sustainability considerations The report then

concludes with a discussion of the policies and strategies to transform food systems to ensure affordable healthy diets as part of the required efforts to end both hunger and all forms of malnutrition *Levels and trends in child malnutrition*, 2021-05-05 UNICEF WHO WB Joint Child Malnutrition Estimates JME inter agency group updates regularly the global and regional estimates in prevalence and numbers for each indicator The JME estimates are used for monitoring of the 2025 nutrition targets endorsed by the World Health Assembly in 2012 and their extension to 2030 proposed by WHO and UNICEF for the monitoring of the SDG 2.2 targets 2.2.1 stunting and 2.2.2 wasting and overweight The goal of the annual key findings is to inform monitoring efforts towards the nutrition targets set by countries as well as other key data stakeholders such as health related institutions academia civil societies and donors **UNAIDS Global AIDS Update 2024** UNAIDS, 2024-07-22 The report titled *The Urgency of Now* AIDS at a Crossroads demonstrates the HIV response is at a crossroads success or failure will be determined by which path leaders take The report shows that the decisions leaders make this year will determine whether AIDS is ended as a public health threat by 2030 Taking the wrong path by limiting resourcing or clamping down on human rights would lead the pandemic to continue to grow costing millions more lives and undermining global health security Technical Notes and Extracts from Reports of Coast Artillery Target Practice United States. War Department. General Staff, 1915 Technical Notes of Coast Artillery Target Practice ... United States.
