CROSS-INDUSTRY CYBER DEFENSE: ADVANCED TECHNIQUES FOR IT, MEDICAL, AND FINANCIAL SECURITY Venkatesh Kodela, 2025-05-23 The fast development of digital technologies has dissolved traditional barriers across industries in today's interconnected world elevating the need of cross sector cybersecurity to the level of an absolute requirement. There is growing interdependence and susceptibility to complex assaults in the information technology IT healthcare HR and banking FIN industries all of which have their own set of challenges regulatory mandates and distinct threat vectors. Cross Industry Cyber Defence Advanced Techniques for IT Medical and Financial Security is an attempt to investigate and compile the state of the art tactics and resources needed to protect these vital sectors. This work promotes an approach to security that is more integrated robust and intelligence driven and it fosters collaboration across sectors as opposed to traditional frameworks that generally function in silos. It stresses the significance of proactive threat detection compliance and governance while diving into the details of securing IT infrastructure safeguarding sensitive health data under HIPAA and associated regulations and strengthening financial networks against fraud and interruption. This volume seeks to equip stakeholders cybersecurity professionals lawmakers researchers and organisational leaders to reevaluate defence architectures close industry gaps and construct an ecosystem resilient to present and future digital risks in an era where cyber threats are changing at a faster rate than regulatory frameworks

Creating Business Value with Information Technology: Challenges and Solutions Shin, Namchul, 2002-07-01 Questions on the business value of information technology IT which have been raised by managers and researchers for the last decade are not settled yet. Firms invest in IT to improve their business performance. However some firms fail to improve their business performance while others succeed. The overall value of IT varies enormously from firm to firm. Computerization does not automatically create business value but it is one essential component that should be coupled with organizational changes such as new strategies new business processes and new organizational structure. Creating Business Value with Information Technology Challenges and Solutions aims to solicit the studies that yield significant new insights into the business value of IT
