Networking Globe New Technologies Postcolonial:

Networking the Globe Florian Stadler, Ole Birk Laursen, 2017-10-02 Contemporary events which have catastrophic global ramifications such as the current economic crisis or on going conflicts across the globe are not only mediated by super fast digital communication and information networks but also conditioned by the presence of rapidly advancing technologies From social network sites like YouTube and Facebook to global satellite news channels like Al Jazeera or the BBC World Service digital forms of culture have multiplied in recent years creating global conduits and connections which shape our lives in many ways Bringing together an interdisciplinary group of scholars this book addresses how new technologies have impacted discussions of identity place and nation and how they are shifting the parameters of postcolonial thought Each chapter reflects on current research in its respective field and presents new directions on the interconnection between new technologies and the postcolonial in a contemporary context Offering a major intervention in debates around global networks this thought provoking collection highlights innovative research on new technologies and its impact on a postcolonial world This book was originally published as a special issue of the Journal of Postcolonial Writing *Reworking Postcolonialism* P. Malreddy, B. Heidemann, O. Laursen, 2015-04-22 An interdisciplinary collection of essays *Reworking Postcolonialism* explores questions of work precarity migration minority and indigenous rights in relation to contemporary globalization It brings together political economic and literary approaches to texts and events from across the postcolonial world

Postcolonialism: A Guide for the Perplexed Pramod K. Nayar, 2010-10-21 Postcolonialism as a critical approach and pedagogic practice has informed literary and cultural studies since the late 1980s The term is heavily loaded and has come to mean a wide and often bewildering variety of approaches methods politics and ideas Beginning with the historical origins of postcolonial thought in the writings of Gandhi Césaire and Fanon this guide moves on to Edward Said's articulation into a critical approach and finally to postcolonialism's multiple forms in contemporary critical thinking including theorists such as Bhabha Spivak Arif Dirlik and Aijaz Ahmed Written in jargon free language and illustrated with examples from literary and cultural texts this book addresses the many concerns forms and specializations of postcolonialism including gender and sexuality studies the nations and nationalism space and place history and politics It explains the key ideas concepts and approaches in what is arguably the most influential and politically edged critical approach in literary and cultural theory today *The Post-colonial Studies Reader* Bill Ashcroft, Gareth Griffiths, Helen Tiffin, 2006 Boasting new extracts from major works in the field as well as an impressive list of contributors this second edition of a bestselling Reader is an invaluable introduction to the most seminal texts in post colonial theory and criticism *Perspectives on Global Development and Technology*, 2006 *The Postcolonial Aura* Arif Dirlik, 2018-02-20 The essays in this volume range from questions of cultural self representation in China to more general problems of reconceptualizing global relationships in response to contemporary changes Although the new era of global capitalism calls for the remapping of global relations such remapping must be

informed both by a grasp of contemporary structures of economic political and cultural power and by memories of earlier radical visions of society Without these two conditions Arif Dirlik argues the current preoccupation with Eurocentrism ethnic diversity and multiculturalism distract from issues of power that dominate global relations and that find expression in murderous ethnic conflicts Dirlik offers multi historicalism which presupposes a historically grounded conception of cultural difference seeks in different histories alternative visions of human society and stresses divergent historical trajectories against a future colonized presently by an ideology of capital Arguing that the operations of capital have brought the question of the local to the fore he points to indigenism as a source of paradigms of social relations and relationships to nature to challenge the voracious developmentalism that undermines local welfare globally

Encyclopedia of Communication Theory: J - Y Stephen W. Littlejohn, Karen A. Foss, 2009 Provides students and researchers with a comprehensive overview of contemporary communication theory Entries address topics related not only to paradigms traditions and schools but also metatheory methodology inquiry and applications and contexts
