Social Networks - Blessing Or Curse? Ruben Picard,2011 Facharbeit Schule aus dem Jahr 2011 im Fachbereich Englisch Erörterungen und Aufsätze Note 2 Stadt Heinrich Heine Gymnasium Mettmann Sprache Deutsch Abstract In the past few years a great number of social networks have appeared on the internet Though the term social network seems to be something new something associated with the world wide web and new technologies social networks have existed ever since men have Any interacting group of people can be considered a social network and is defined by the relationships between the individuals That makes it really interesting to find a system that was part of our lives from the cradle of humankind being faced with such a young invention called the internet Today every fourth internet user is on Facebook1 that is half a billion people So if Facebook users were a nation it would be the third most populated country in the world after China and India and there are still more users of other social networks that is quite astonishing I decided to write a research paper about social networks on the internet because I could hardly distinguish whether my own use of such services is either beneficial or reprehensible These days new services on the internet that promise to be very entertaining or apparently have a high potential to improve or simplify the way we work and communicate seem to be very attractive to a wide range of internet users While some people are quite sceptical about online services like social networks others tend to use them without even considering any potential risks Are they just blinded by the revolutionary possibilities based on the Web 2 0 or do we actually not have anything to fear The social network Facebook will serve as my basic example for the analysis of social networks because it is the most used and thereby most discussed social network on the world wide web its structure also generally represents other similar

networks These social networks are surprising
