*Understanding Religion and Artificial Intelligence* Randall Reed, Tracy J. Trothen, 2025-09-15. Is artificial intelligence just another tool, or is it something more? Special In *Understanding Religion and Artificial Intelligence: Meaning Making in the Digital Age*, Randall Reed and Tracy J. Trothen delve into this provocative question, revealing how our perceptions of AI are deeply intertwined with age-old human impulses to define the extraordinary. Introducing their innovative Model of the Special, Reed and Trothen illuminate how individuals, groups, and cultures dynamically shape AI's meaning, ranging from the mundane to the Sacred and Demonic. Through compelling case studies from AI chatbots, sport, and art to self-driving cars and Deadbots, the authors explore how narratives of awe, fear, and even transcendence position AI as a truly Special thing in our modern world. Drawing on insights from religious studies, ethics, and sociology, this interdisciplinary exploration provides a crucial framework for understanding the profound societal, ethical, and spiritual implications of AI. *Understanding Religion and Artificial Intelligence* invites readers to engage in vital conversations about AI's impact on meaning, values, and the very fabric of human experience in this rapidly evolving digital age. Prepare to see AI and ourselves in a whole new light.

*Four Battlegrounds* Paul Scharre, 2023-02-28. An NPR 2023 Books We Love Pick, One of the Next Big Idea Club's Must Read Books. An invaluable primer to arguably the most important driver of change for our future. P. W. Singer, author of *Burn In*, an award-winning defense expert, tells the story of today's great power rivalry: the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. *Four Battlegrounds* argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power; control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best researchers and most advanced technology companies? The fourth battlefield is, maybe, the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's National Team

of leading AI companies to show the chilling synergy between China's government private sector and surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent. Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct. **Four Battlegrounds** offers a vivid picture of how AI is transforming warfare, global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order. **RAG × LangChain** [AI](#) [iThome](#) [2025-08-03](#) [RAG LangChain AI 16](#) [iThome AI LangChain LLM AI LLM RAG AI LLM RAG Python PyCharm OpenAI API MongoDB Atlas LangChain DeepEval LLM as a Judge RAG AI RAG RAG AI Python RAG RAG AI LLM RAG LangChain RAG LLM RAG](#) **Unlocking the Potential of OpenAI's ChatGPT** DAVID YAO, Have you heard of OpenAI's ChatGPT but have no idea what it is or how to use it?
